

Early Notice of Importance of Public Participation in Subsequent Environmental Review

A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the Federal Register.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 comment period so that comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

SUPPLEMENTARY INFORMATION:

I. Abstract

In preparation for the 2010 Census, the U.S. Census Bureau will conduct a Census Coverage Measurement (CCM) test as part of the 2008 Census Dress Rehearsal. The 2008 Census Dress Rehearsal will be conducted in two sites, one urban, and the other one, a mix of urban and suburban. San Joaquin County, California is the urban site. South Central North Carolina has been selected as the urban/suburban mix test site. This area consists of Fayetteville and nine counties surrounding Fayetteville (Chatham, Cumberland, Harnett, Hoke, Lee, Montgomery, Moore, Richmond, and Scotland). As is typical, the CCM operations and activities will be conducted separate from and independent of the census operations. The CCM program for the dress rehearsal is designed to test that all planned coverage measurement operations are working as expected, that they are integrated internally, and that

they are coordinated with the appropriate census operations. This is particularly important because the dress rehearsal is the first time in the 2010 census cycle that CCM operations for housing units will be conducted. The CCM operations planned for the dress rehearsal, to the extent possible, will mirror those that will be conducted for the 2010 Census to provide estimates of net coverage error and coverage error components (omissions and erroneous enumerations) for housing units and persons in housing units (see Definition of Terms). The data collection and matching methodologies for previous coverage measurement programs were designed only to measure net coverage error, which reflects the difference between omissions and erroneous inclusions.

The Independent Listing Operation is the first step in the CCM process. It will be conducted to obtain a complete housing unit inventory of all the addresses within the CCM sample block clusters before the 2008 Census Dress Rehearsal enumeration commences. In both dress rehearsal sites, enumerators will canvass every street, road, or other place where people might live in their assigned block clusters and constructs a list of housing units. Enumerators will contact a member (or proxy) of each housing unit to ensure all units at a given address are identified. They also identify the location of each housing unit by assigning map spots on block cluster maps provided with their assignment materials. If an enumerator is uncertain whether a particular living quarters is a housing unit, it will be listed and flagged for followup (this will be a part of the Initial Housing Unit Followup). Following the completion of each block cluster, the listing books are keyed for matching against the census Decennial Master Address File (DMAF) for the same areas.

Completed Independent Listing Books are subject to Quality Control (QC) wherein QC listers return to the field to check 12 units per cluster to ensure that the work performed is of acceptable quality and to verify that the correct blocks were visited. If the cluster fails the QC, then the QC lister reworks the entire cluster.

The Independent Listing results will be computer and clerically matched to the DMAF from the census in the same areas. As the result of the matching an additional relisting operation can occur for block clusters suspected of high levels of geocoding errors in the original independent listing. The methods and procedures for relisting will be the same as those for the listing operation. There will be one Independent Listing Form,

DX-1302, that will be used for listing, QC, and relisting.

The addresses that remain unmatched or unresolved after matching will be sent to the field during the next field operation of the CCM, Initial Housing Unit Followup, to collect additional information that might allow a resolution of any differences between the independent listing results and the census DMAF. Cases will also be sent to resolve potential duplicates and unresolved housing unit/group quarter status. The forms and procedures to be used in the Initial Housing Unit Followup phase of the CCM in the 2008 Census Dress Rehearsal and all subsequent CCM phases will be submitted separately.

II. Method of Collection

The independent listing and relisting operations will be conducted using person-to-person interviews.

Definition of Terms

Components of Coverage Error—The two components of census coverage error are census omissions (missed persons or housing units) and erroneous inclusions (persons or housing units enumerated in the census that should not have been). Examples of erroneous inclusions are: persons or housing units enumerated in the census that should not have been enumerated at all, persons or housing units enumerated in an incorrect location, and persons or housing units enumerated more than once (duplicates).

Net Coverage Error—Reflects the difference between census omissions and erroneous inclusions. A positive net error indicates an undercount, while a negative net error indicates an overcount.

Initiation of Antidumping Duty Administrative Review: Canned Pineapple Fruit from Thailand

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On August 30, 2006, the Department of Commerce (the Department) initiated an administrative review of the antidumping duty order on canned pineapple fruit (CPF) from Thailand. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 71 FR 51573 (August 30, 2006) (*Initiation Notice*). In that notice, the Department did not initiate a review of Tropical Food Industries Co. Ltd. (TROFCO) because the company's request for review was untimely filed. After considering the facts on the record, the Department is now initiating a review of TROFCO.

EFFECTIVE DATE: October 10, 2006.
