SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Byproduct Materials License No. 37-17860-02. This license is held by the Pennsylvania Department of Environmental Protection, Bureau of Radiation Protection (PADEP, BRP) (the Licensee), for its Quehanna Facility (the Facility), located in Karthaus, Pennsylvania. Issuance of the amendment would incorporate revision four of the Decommissioning Plan (DP) into the license to allow completion of decommissioning activities at the site and eventual unrestricted release of the Facility.

The land in the vicinity of the Facility is used for recreational activities, including hiking, camping, and hunting. The site contains one large building, several smaller buildings, asphalt parking lots and driveways, a septic system leach field used for sanitary sewer waste, and an approximately one acre pond. The main building was constructed to house a pool reactor and associated laboratories,
