Needs and Uses: 47 CFR 76.501 Note 2(f)(1) requires limited partners, Registered Limited Liability Partnerships ("RLLPs"), and Limited Liability Companies ("LLCs") attempting to insulate themselves from attribution to file a certification of "non-involvement" with the Commission. LLCs who submit the non-involvement certification are required to submit a statement certifying that the relevant state statute authorizing LLCs permits an LLC member to insulate itself in the manner required by our criteria. 47 CFR 76.501 Note 2, 76.503 Note 2, and 76.504 Note 2, also provide that officers and directors of an entity are considered to have a cognizable interest in the entity with which they are associated. The filings required by these rules will be used by the Commission to determine the nature of the corporate, financial, partnership, ownership and other business relationships that confer on their holders a degree of ownership or other economic interest, or influence or control over an entity engaged in the provision of communications services such that the holders are subject to the Commission's regulations.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0678.

Title: Part 25 of the Commission's Rules Governing the Licensing of, and Spectrum Usage by Satellite Network Stations and Space Stations.

Form No.: FCC Form 312, including Schedule B; Schedule S.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 3,473.

Estimated Time per Response: .50-40 hours.

Frequency of Response: On occasion and annual reporting requirements and third party disclosure requirements.

Total Annual Burden: 42,136 hours.

Needs and Uses: The Commission will submit this revised information

collection to OMB after this 60-day comment period to obtain the full three-year clearance from them.

The Federal Communications Commission ("Commission"), on its own motion, proposes to revise OMB Control No. 3060-0678 to add a section to the Application for Satellite Space and Earth Station Authorizations (FCC Form 312) which will enable satellite applicants to certify whether or not they are subject to geographic service or geographic coverage requirements and whether they will comply with the requirements. Currently, Section 25.148(c) of the Commission's rules requires Direct Broadcast Satellite (DBS) operators to provide service to Alaska and Hawaii if "technically feasible," or to provide a technical analysis showing that such service is not technically feasible. In addition, some Mobile Satellite Service (MSS) operators and Non-geostationary Satellite Orbit Fixed Satellite Service (NGSO FSS) operators have similar geographic coverage requirements. For example, Ka-band NGSO FSS systems must provide service between 70° North Latitude and 55° South Latitude for at least 75 percent of every 24-hour period in accordance with Section 25.145(c)(1) of the Commission's rules. The Commission also proposes to require other applicants to provide this certification in the event that it expands its geographic rules, as proposed in two pending rulemakings. See 71 FR 43687 (Aug. 2, 2006); 71 FR 56923 (Sept. 28, 2006).

The addition of the certification will require modification of the FCC Form 312 which is housed in the International Bureau Filing System ("MyIBFS"), an electronic filing system. In 2005, the Commission received approval from the Office of Management and Budget (OMB) for mandatory electronic filing of all satellite and earth station applications. Therefore, all certifications must be filed with the Commission electronically in MyIBFS.

This collection is used by the Commission staff in carrying out its duties concerning satellite communications as required by Sections 301, 308, 309 and 310 of the Communications Act, 47 U.S.C. 301, 308, 309, 310. This collection is also used by the Commission staff in carrying out its duties under the World Trade Organizations (WTO) Basic Telecom Agreement. The information collection requirements accounted for in this collection are necessary to determine the technical and legal qualifications of applicants or licensees to operate a station, transfer or assign a license, and to determine whether the
