

Description of the Test Program

A notice describing the Electronic FTZ Admissions Application test program and setting forth the program's terms and conditions was published in the **Federal Register** (70 FR 48774) on August 19, 2005. The voluntary test program permitted the electronic filing of FTZ admission applications (CBP Form 214—"FTZ Admission and/or Status Designation") with CBP via the Automated Broker Interface (ABI). That document stated that the test program was to commence no earlier than September 30, 2005, and continue to run for a period of approximately 6 months with a final evaluation to take place at the end of that period.

This notice informs interested members of the public that after CBP's initial evaluation of the test program, it was determined that due to the insufficient data collected the test should be run again for a period of approximately 6 months from March 26, 2007. The new test program is intended to encourage greater participation in the prototype by the trade and thereby provide CBP with more meaningful data by which to assess the feasibility of implementing the test program on a permanent basis. A final evaluation will take place at the end of the test period.

All of the Electronic FTZ Admissions Application test program terms and conditions set forth in the August 19, 2005, **Federal Register** notice will be in effect.

Dated: March 15, 2007.

Assistant Commissioner, Office of Field Operations.

Title of Proposal: Survey of Market Absorption of New Multifamily Units.

OMB Control Number: 2528-0013 (Expires 11/30/2007).

Description of the need for the information and proposed use: The Survey of Market Absorption (SOMA) provides the data necessary to measure the rate at which new rental apartments and new condominium apartments are absorbed; that is, taken off the market, usually by being rented or sold, over the course of the first twelve months following completion of a building. The data are collected at quarterly intervals until the twelve months conclude, or until the units in a building are completely absorbed. The survey also provides estimates of certain characteristics, i.e., asking rent/price, number of units, and number of bedrooms. The survey provides a basis for analyzing the degree to which new apartment construction is meeting the present and future needs of the public. Additionally, beginning with new construction in 2002, the survey will attempt to ascertain the number and degree of services provided by "Assisted Living" type units.

Members of affected public: Rental Agents/Builders.

Estimated Number of Respondents: 12,000 yearly (maximum).
