## DEPARTMENT OF DEFENSE

### Department of the Army, Corps of Engineers

#### Availability of a Tiered Final Environmental Impact Statement Containing a Draft Air Quality General Conformity Determination for the Proposed Construction of a Dredged Material Containment Facility in the Patapsco River, at Masonville, Baltimore City, MD

**AGENCY:** Department of the Army, U.S.  
Army Corps of Engineers, DOD.

**ACTION:** Notice of availability.

**SUMMARY:** In accordance with  
requirements of the National  
Environmental Policy Act (NEPA), the  
U.S. Army Corps of Engineers (USACE),  
Baltimore District, has prepared a Final  
Environmental Impact Statement (FEIS)  
for the proposed construction of a  
dredged material containment facility  
(DMCF) by the Maryland Port  
Administration (MPA). This FEIS was  
prepared as part of the submission of  
MPA's application for a Department of  
the Army permit to construct the facility

in the Patapsco River, Baltimore City,  
MD. This application will be evaluated  
pursuant to Section 10 of the Rivers and  
Harbors Act of 1899 and Section 404 of  
the Clean Water Act.

The preferred alternative is for the  
construction of a stone, sand, and  
cofferdam structure that would impact  
approximately 131 acres of waters of the  
United States, including jurisdictional  
wetlands. The structure would be  
initially constructed to 10 feet above the  
mean lower low water (MLLW)  
elevation, with a future temporary  
elevation to 42 feet above MLLW, and  
an ultimate elevation of 36 feet above  
MLLW. The project would also include  
mechanical dredging of approximately  
1.5 million cubic yards of overburden  
material within the footprint of the  
proposed disposal site, and the  
placement of this material at the Hart  
Miller Island disposal site, Baltimore  
County, MD. On-site (Masonville  
borrow) and offsite borrow material  
(Seagirt borrow material and upland  
borrow) would be used for the  
construction of the containment facility.  
The Seagirt borrow material would  
come from the Seagirt Marine Terminal  
Access Channel deepening and  
widening project. The Draft EIS was  
advertised in the **Federal Register** on  
May 19, 2006 (71 FR 29128). A  
supplement to the Draft EIS was  
advertised in the **Federal Register** on  
June 30, 2006 (71 FR 37545). The need  
to prepare a Supplement was due to the  
applicant's proposal to change the  
source of borrow material for the  
proposed construction of the preferred  
alternative to include the use of suitable  
material dredged from the Seagirt  
Marine Terminal Access Channels. The  
FEIS evaluates the construction of a  
DMCF with a footprint of 141 acres,  
which includes 131 acres of tidal open  
water and wetlands. The DMCF would  
be constructed to an initial height of 10  
feet above MLLW and then raised to a  
height of 42 feet above MLLW before  
being graded to a final height of 36 feet  
MLLW, which would be the same height  
as the adjacent land. A detailed  
description of the proposed project and  
effects to the human environment are  
discussed in the FEIS for the Masonville  
DMCF. The FEIS outlines measures the  
applicant may implement to address  
impacts to air quality resulting from  
activities described in the permit  
application.

**ADDRESSES:** Please send written  
comments to the U.S. Army Corps of  
Engineers, Baltimore District, Attn: Mr.  
Jon Romeo, CENAB-OP-RMN, P.O. Box  
1715, Baltimore, MD 21203-1715. You  
may submit electronic comments to

[jon.romeo@usace.army.mil](mailto:jon.romeo@usace.army.mil). Your comments must be contained in the body of your message; please do not send attached filed. Please include your name and address in your message.

**FOR FURTHER INFORMATION PLEASE**

**CONTACT:** Mr. Jon Romeo, (410) 962-6079.

**SUPPLEMENTARY INFORMATION:** The FEIS integrates analyses and consultation required by the National Environmental Policy Act (NEPA), Section 10 of the Rivers and Harbors Act of 1899, Section 401 and Section 404 of the Clean Water Act, Section 7 of the Endangered Species Act, the Clean Air Act, the U.S. Fish and Wildlife Coordination Act, Section 106 of the National Historic Preservation Act, and the Magnuson-Stevens Fishery Conservation and Management Act. All appropriate documentation (i.e., Section 7 and Section 106 coordination letters and public and agency comments) have been obtained and are included as part of the FEIS. In compliance with the Clean Air Act, a Draft Air Quality General Conformity Determination has been completed and is available in the FEIS for public comment. The USACE has preliminarily determined that the General Conformity Analysis prepared for the proposed Masonville Dredged Material Containment Facility (DMCF) dated November 17, 2006, with the compensation proposed, conforms to the General Conformity requirements of the Clean Air Act. A final determination will be made no sooner than thirty (30) days from the date of this notice. The decision on whether or not to issue a Department of the Army permit for this project will be based on an evaluation of the probable impact, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit, which may reasonably be expected to accrue from the proposal, will be balanced against it reasonably foreseeable detriments. All factors that may be relevant to the proposal are considered as part of the evaluation process. Factors relevant to the proposed project include: Conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water and air quality, hazardous, toxic, and radioactive substances, threatened and endangered species, regional geology energy needs, food and fiber production, safety,

environmental justice, cumulative impacts and the general needs and welfare of the public.
