Title: NESHAP for Primary Magnesium Refining (Renewal)

ICR Numbers: EPA ICR Number 2098.03, OMB Control Number 2060-0536.

ICR Status: This ICR is scheduled to expire on January 31, 2007. Under OMB regulations, the Agency may continue to conduct, or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct, or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in Title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register**, or by other appropriate means, such as on the related collection instrument, or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Respondents are owners or operators of primary magnesium refining operations. Owners, or operators of the affected facilities described must make initial reports when a source becomes subject to the standard; conduct and report on a performance test; demonstrate and report on continuous monitor performance; and maintain records of the occurrence and duration of any

startup, shutdown, or malfunction in the operation of an affected facility. Semiannual reports of excess emissions are required. These notifications, reports, and records are essential in determining compliance and are required, in general, of all sources subject to National Emission Standards for Hazardous Air Pollutants (NESHAP). Any owner, or operator subject to the provisions of this part shall maintain a file of these measurements and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct, or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 156 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to, or for, a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of primary magnesium refining operations.

Estimated Number of Respondents: 1.
Frequency of Response: Initially, On Occasion, Semiannually.

Estimated Total Annual Hour Burden: 612.

Estimated Total Annual Cost: \$52,948, includes no capital/startup costs and \$1,200 annualized O&M costs.

Changes in the Estimates: There is a decrease of 119 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR

Burdens. The decrease in burden reflects completion of activities that do not need to be repeated to comply with the rule. The increase in O&M costs is due to maintenance of equipment used to verify compliance with the rule requirements.

Dated: January 12, 2007.

Director, Collection Strategies Division.

Title: NESHP for Plastic Parts and Products Surface Coating (Renewal).

ICR Numbers: EPA ICR Number 2044.03, OMB Control Number 2060-0537.

ICR Status: This ICR is scheduled to expire on January 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of

information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Respondents are owners, or operators of plastic parts and products surface coating operations. Owners, or operators of the affected facilities described must make initial reports when a source becomes subject to the standard, conduct and report on a performance test, demonstrate and report on continuous monitor performance, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility. Semiannual reports of excess emissions are required. These notifications, reports, and records are essential in determining compliance and are required, in general, of all sources subject to National Emission Standards for Hazardous Air Pollutants (NESHAP). Any owner, or operator subject to the provisions of this part shall maintain a file of these measurements and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state, or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct, or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 77 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the

existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of plastic parts and products surface coating operations.

Estimated Number of Respondents: 828.

Frequency of Response: Initially, Semiannually, On Occasion.

Estimated Total Annual Hour Burden: 321,393.

Estimated Total Annual Cost: \$ 27,220,752, includes \$16,000 capital/startup costs and \$248,400 annualized O&M costs.

Changes in the Estimates: There is an increase of 278,860 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The increase in burden reflects the need for facilities to be in compliance with the rule requirements prior to the date of this ICR, and a revision in the number of facilities subject to the NESHP. The increase in Operations and Maintenance cost is due to installation and maintenance of equipment used to verify compliance with the rule requirements.
