SUPPLEMENTARY INFORMATION:

I. General Information

The U.S. Environmental Protection Agency and U.S. Army Corps of Engineers are issuing agency guidance, effective immediately, regarding Clean Water Act (CWA) jurisdiction following the U.S. Supreme Court's decision in the consolidated cases *Rapanos v. United States* and *Carabell v. United States* (126 S. Ct. 2208 (2006)) ("*Rapanos*"). Congress enacted the Clean Water Act ("CWA") (33 U.S.C. 1251(a)) "to restore and maintain the chemical, physical, and biological integrity of the Nation's waters." One of the mechanisms adopted by Congress to achieve that purpose is a prohibition on the discharge of any pollutants, including dredged or fill material, into "navigable waters" except in compliance with other specified sections of the CWA (33 U.S.C. 1311(a) and 1362(12)(A)). In most cases, this means compliance with a permit issued pursuant to CWA section 402 or section 404. The CWA defines the term "discharge of a pollutant" as "any addition of any pollutant to navigable waters from any point source[.]" (33 U.S.C. 1362(12)(A)) and provides that "[t]he term 'navigable waters' means the waters of the United States, including the territorial seas[.]" (33 U.S.C. 1362(7); 33 CFR 328.3(a) and 40 C.F.R. 230.3(s)). In *Rapanos*, the Court addressed where the Federal government can apply the CWA, specifically by determining whether a wetland or tributary is a "water of the United States." The justices issued five separate opinions in *Rapanos* (one
