

to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 732.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 29,613 hours.

Estimated total annual costs:

\$1,187,537. This includes an estimated burden cost of \$1,187,537 and an estimated zero cost for capital investment or maintenance and operational costs.

Are There Changes in the Estimates from the Last Approval?

There is no change in hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. However, the estimated total annual costs are increased by \$83,480 due to increased costs of employment compensation since the previous approval.

What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the National Coordinator for Health Information Technology; American Health Information Community; Announcement of Public Comment Period About the Design and Implementation of the American Health Information Community Successor

SUMMARY: This notice announces a public comment period, from August 6, 2007 to August 31, 2007, to collect input about ideas for the design and implementation of a successor entity for the American Health Information Community (AHIC) as described in the *American Health Information Community Successor White paper, July 2007* (available on the Web at <http://www.hhs.gov/healthit/community/background/AHICsuccessor.html> on or after July 31, 2007).

The ANIC is a federally-chartered advisory committee that provides input and recommendations to the Department of Health and Human Services (HHS) on how to make health records digital and interoperable, and how to assure that the privacy and security of those records are protected. The charter of the AHIC requires that its responsibilities be transferred to a successor entity. Therefore, HHS and the AHIC are embarking upon a project that will take the AHIC to the next level. The successor entity will be an independent, sustainable public-private partnership that brings together the best of the public and private sectors. This
