SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The

Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The ICR addresses the burden hours associated with gathering information to complete the OSHA-70 Form and the cost associated with completing the OSHA-71 and OSHA-72 forms that are required by OSHA's maritime employment regulations. These maritime regulations require employers to have an OSHA-71 Form issued for equipment found to be in a safe condition and the OSHA-72 Form issued for equipment that is found to be unsafe. These forms are issued by third parties who have applied to OSHA, on the OSHA-70 Form, for accreditation to certify gear used in maritime employment.

The OSHA-70 Form is used by applicants seeking accreditation from OSHA to be able to test or examine certain equipment and material handling devices as required under the maritime regulations, part 1917 (Marine Terminals), and part 1918 (Longshoring). The OSHA-70 Form application for accreditation provides an easy means for companies to apply for accreditation.

The OSHA-71 Form is required to be issued by those accredited by OSHA to employers in the maritime industry to make it known that certain equipment and material handling devices are safe to use or operate.

The OSHA-72 Form is required to be issued by those accredited by OSHA to employers in the maritime industry when the equipment or material handling device is found to be unsafe to use.

The collection of the information needed to complete these forms is necessary to provide an effective and efficient means of enabling employers and employees to determine if cargo gear, equipment, and/or other material handling devices are safe to use.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary

for the proper performance of the Agency's functions, including whether the information is useful;

- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Gear Certification (29 CFR part 1919). The Agency is requesting to reduce its current burden hour estimate associated with this Standard from 81 hours to 70 hours for a total reduction of 11 hours. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Gear Certification Standard (29 CFR part 1919); OSHA-70 Form.

OMB Number: 1218-0003.

Affected Public: Business or other for-profit;

Number of Respondents: 450.

Total Responses: 450.

Estimated Time per Response: Varies from 5 minutes (.08 hour) for an employer to disclose the OSHA-71 or -72 Form to an OSHA Compliance Officer during an inspection to 45 minutes (.75 hour) for a prospective accredited agency to complete the OSHA-70 Form.

Total Burden Hours: 70.

Estimated Cost (Operation and Maintenance): \$1,452,000.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

- (1) Electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal;
- (2) by facsimile (FAX); or

You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket

Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

MILLENNIUM CHALLENGE CORPORATION

[MCC FR 07-10]

Notice of Entering Into a Compact With the Government of the Kingdom of Morocco

AGENCY: Millennium Challenge Corporation.

ACTION: Notice.

SUMMARY: In accordance with Section 610(b)(2) of the Millennium Challenge Act of 2003 (Pub. L. 108-199, Division D), the Millennium Challenge Corporation (MCC) is publishing a summary and the complete text of the Millennium Challenge Compact between the United States of America, acting through the Millennium Challenge Corporation, and the Government of the Kingdom of Morocco. Representatives of the United States Government and the Government of the Kingdom of Morocco executed the Compact documents on August 31, 2007.

Dated: September 12, 2007.

William G. Anderson, Jr.,

*Vice President & General Counsel,
Millennium Challenge Corporation.*

Summary of Millennium Challenge Compact With the Government of the Kingdom of Morocco

A. Introduction

Over the past three decades, the Moroccan economy has grown slowly—from 1980 to 2006, per capita incomes

only grew 1.5% annually. Despite recent macroeconomic stability, slow growth has left unemployment consistently high and extreme poverty remains around 11%.

In this context, the Government (the "GoM") of the Kingdom of Morocco ("Morocco") launched a national growth strategy, the Plan Emergence, in 2005, which aims to "modernize and strengthen existing industrial sectors, and target investments in sectors such as textiles, agribusiness, fishing and the crafts industries, where the country has domestic and international competitive advantage." As a complement to this strategy and to ensure that the poor benefit from growth in high potential sectors, the GoM has proposed a Millennium Challenge Account investment program (the "Program"), the funding of which will be memorialized in a Millennium Challenge Compact (the "Compact"), that seeks to stimulate economic growth by increasing productivity and improving employment in high potential sectors.

B. Program Overview and Budget

1. Goal and Objectives

The goal of Morocco's proposed \$697.5 million Compact is to reduce poverty through economic growth. The Program's objective is to stimulate economic growth by increasing productivity and improving employment in high potential sectors. The Program focuses on investments in fruit tree productivity, small-scale fisheries, and artisan crafts in order to modernize and unlock opportunities in these sectors. Small business creation and growth will be supported by investments in financial services and enterprise support. The Program budget is summarized in the table below:

Project USD millions	CIF ¹	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Total
Fruit Tree Productivity	6.96	25.86	84.32	93.86	60.80	29.10	300.90

¹ Compact Implementation Funding (CIF) provided pursuant to Section 609(g) of the Millennium Challenge Act of 2003. CIF will be used prior to entry into force of the Compact for feasibility and design studies, environmental assessments and plans, monitoring and evaluation activities and certain other administrative expenses and start-up costs.
