

Petitioner: Chestnut Coal Company, RR 3, Box 142, Sunbury, Pennsylvania 17801.

Mine: #11 Slope Mine, MSHA I.D. No. 36–09475, located in Northumberland County, Pennsylvania.

Regulation Affected: 30 CFR 75.1200(d) & (i) (Mine map).

Modification Request: The petitioner proposes to use cross-sections instead of contour lines through the intake slope at locations of rock tunnel connections between veins, and at 1,000 foot intervals of advance from the intake slope. In addition, the petitioner proposes to limit the required mapping of the mine workings above and below to those present within 100 feet of the veins being mined, except when these veins are interconnected to other veins beyond the 100-foot limit, through rock tunnels. The petitioner states that contours provide no useful information due to the steep pitch encountered in mining anthracite coal veins, and their presence would make portions of the map illegible. The petitioner further states that use of cross-sections in lieu of contour lines has been practiced since the late 1800's and provides critical information about the spacing between veins and the proximity to other mine workings, which fluctuate considerably. Additionally, the petitioner states that the mine workings above and below are usually inactive and abandoned, and therefore not subject to changes during the life of the mine. The petitioner states that all mapping for mines above and below are researched by its contract engineer for the presence of interconnecting rock tunnels between veins in relation to the mine and a hazard analysis is done when mapping indicates the presence of known or potentially flooded workings. The petitioner asserts that when evidence indicates that prior mining was conducted on a vein above or below and research exhausts the availability of mine mapping, the vein will be considered to be mined and flooded and appropriate precautions will be taken under 30 CFR 75.388, where possible. Where potential hazards exist and in-mine drilling capabilities limit penetration, petitioner will drill surface boreholes to intercept the mine workings and will analyze the results prior to mining in the affected area. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

Docket Number: M–2007–056–C.

Petitioner: Chestnut Coal Company, RR 3, Box 142, Sunbury, Pennsylvania 17801.

Mine: #11 Slope Mine, MSHA I.D. No. 36–09475, located in Northumberland County, Pennsylvania.

Regulation Affected: 30 CFR 75.1202 and 75.1202–1(a) (Temporary notations, revisions, and supplements).

Modification Request: The petitioner requests a modification of the existing standard to permit the required interval of survey to be established on an annual basis from the initial survey lieu of every 6 months. The petitioner proposes to update the mine map by hand notations on a daily basis, conduct subsequent surveys prior to commencing retreat mining, and when either a drilling program under 30 CFR 75.388 or plan for mining into accessible areas under 30 CFR 75.389 is required. The petitioner states that: (1) Low production and slow rate of advance in anthracite mining make surveying on 6 month intervals impractical and, in most cases, annual development is frequently limited to less than 500 feet of gangway advance with associated up-pitch development; (2) the majority of small anthracite mines are using non-mechanized, hand-loading mining methods; (3) development above the active gangway is designed to mine into the level above at designated intervals thereby maintaining sufficient control between both surveyed gangways; and (4) the available engineering/surveyor resources are very limited in anthracite coal fields which makes surveying difficult to achieve. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

Docket Number: M–2007–057–C.

Petitioner: Chestnut Coal Company, RR 3, Box 142, Sunbury, Pennsylvania 17801.

Mine: #11 Slope Mine, MSHA I.D. No. 36–09475, located in Northumberland County, Pennsylvania.

Regulation Affected: 30 CFR 75.1400 (Hoisting equipment; general).

Modification Request: The petitioner proposes to use the slope (gunboat) to transport persons in shafts and slopes using an increased rope strength/safety factor and secondary safety rope connection instead of using safety catches or other no less effective devices. The petitioner asserts that a functional safety catch has not been developed and that the proposed alternative method would provide at least the same measure of protection as the existing standard.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the

Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate.

The Agency is responsible for investigating alleged violations of "whistleblower" provisions contained in a number of Federal statutes. These provisions prohibit retaliation by employers against employees who report alleged violations of certain laws or regulations. Accordingly, these provisions prohibit an employer from discharging or taking any other retaliatory action against an employee with respect to compensation, or the terms, conditions, or privileges of employment because the employee engages in any of the protected activities specified by the "whistleblower" provisions of these Federal statutes.

These Federal statutes are covered under the following regulations: 29 CFR Part 24, Procedures for the Handling of Discrimination Complaints under Federal Employee Protection Statutes (29 CFR Part 24 covers: Safe Water Drinking Act, 42 U.S.C. 300j-9(i); Water Pollution Control Act, 33 U.S.C. 1367; Toxic Substances Control Act, 15 U.S.C. 2622; Solid Waste Disposal Act, 42 U.S.C. 6971; Clean Air Act, 42 U.S.C. 7622; Energy Reorganization Act of 1974, 42 U.S.C. 5851; Comprehensive Environmental Response, Compensation and Liability Act of 1980, 42 U.S.C. 9610); 29 CFR Part 1979, Procedures for Handling Discrimination Complaints Under the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century; 29 CFR Part 1980, Procedures for Handling of Discrimination Complaints Under Section 806 of the Corporate and Criminal Fraud Accountability Act of 2002, Title VIII of the Sarbanes-Oxley Act of 2002; and 29 CFR Part 1981 Procedures for the Handling of Discrimination Complaints under Section 6 of the Pipeline Safety and Improvement Act of 2002.

These regulations specify the procedures that an employee must use to file a complaint with OSHA alleging that their employer violated a "whistleblower" provision for which the Agency has investigative responsibility. Any employee who believes that such a violation occurred may file a complaint, or have the complaint filed on their behalf. While OSHA specifies no particular form for filing a complaint, these regulations require that a complaint must be in writing and should include a full statement of the acts and omissions,

with pertinent dates, which are believed to constitute the violation.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Regulations Containing Procedures for Handling Discrimination Complaints. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Regulations Containing Procedures for Handling Discrimination Complaints.
