

time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP07–457–000]

Iroquois Gas Transmission System, L.P.; Notice of Availability of the Environmental Assessment for the Proposed Iroquois 08/09 Expansion Project

January 4, 2008.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas facilities proposed by Iroquois Gas Transmission System, L.P. (Iroquois) in the above-referenced docket. The Iroquois 08/09 Expansion Project would expand Iroquois' existing system to deliver up to 200,000 dekatherms per day of natural gas transportation service to KeySpan Gas East Corporation at South Commack, Long Island.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act of 1969. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of Iroquois' proposed 08/09 Expansion Project. Iroquois proposes to construct its project in three phases which would consist of: looping¹ its existing pipeline system at three locations in New York and Connecticut by November 1, 2008 (Phase 1); constructing a new compressor station in Milford, Connecticut with 20,620 horsepower of compression by January 1, 2009 (Phase 2); and adding a 10,310 horsepower compressor unit to Iroquois' Brookfield Compressor Station in Brookfield, Connecticut by November 1, 2009 (Phase 3).²

The Phase 1 pipeline looping would include construction of 5.8 miles of 36-inch-diameter pipeline in Boonville, New York; 1.0 miles of 36-inch-diameter pipeline in Wright, New York; and 1.6 miles of 36-inch-diameter pipeline in Newtown, Connecticut. The new pipeline segments would be located adjacent to Iroquois' existing pipeline at these locations.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 502–8371.

Copies of the EA have been mailed to federal, state, and local agencies, public interest groups, interested individuals, newspapers, and parties to this proceeding.

Any person wishing to comment on the EA may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your comments to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426;
- Reference Docket No. CP07–457–000;

¹ A loop is a segment of pipeline that is usually installed to an existing pipeline and connected to it at both ends. The loop allows more gas to be moved through the system.

² The Brookfield Compressor Station was approved by the Commission on December 21, 2006, as part of Iroquois' Market Access Project in Docket No. CP02–31–002. Construction of the Brookfield Compressor Station commenced in the October 2007 and operation of the station is scheduled to commence in the fall of 2008.
