SUPPLEMENTARY INFORMATION:

Proposed Project

*Health Care Systems for Tracking
Colorectal Cancer Screening Tests*

AHRQ proposes to implement and assess a system redesign intervention to

improve colorectal cancer (CRC) screening and follow-up among patients 50-79 years-old. Other goals of the intervention include: (1) Achieving a high level of satisfaction with the intervention among patients, providers, and practice staff, (2) promoting patient-centered care through the intervention, (3) being a cost-effective intervention, and (4) demonstrating the benefits to businesses for implementing the intervention. The research is sponsored by AHRQ under its ACTION (Accelerating Change and Transformation in Organizations and Networks) program, and will be conducted for AHRQ by The CNA Corporation (CNA) and its partners Thomas Jefferson University (TJU) and Lehigh Valley Hospital (LVH).

Colorectal cancer screening is recommended as routine preventive care and this intervention, which is consistent with current CRC screening guidelines, carries no greater risk than that which occurs in usual delivery of healthcare (*i.e.*, screening and follow up done without benefit of this intervention). Nevertheless, as part of standard research practice, the intervention and assessment protocol will be submitted to the Institutional Review Boards (IRB) at both LVH and TJU so that they can review the protocols to ensure that they are consistent with the requirements of human subjects protection as outlined in federal statute, regulations, and guidelines. These approvals will be obtained before the study begins. Additionally, CNA and LVH have a business associate agreement, and all parties involved with the study (CNA, LVH, and TJU) will comply with the Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule, 45 CFR parts 160 and 164. To further protect patient privacy, neither CNA nor TJU will have access to any personally-identifiable data. Only LVH personnel will have access to identifiable data, which they will de-identify before sending to CNA and TJU for analysis. Consistent with this protocol, only LVH staff will have access to patient names and addresses and will conduct all mailings of letters and related material to patients.

The intervention will be implemented in both Family Medicine and General Internal Medicine practices affiliated with the LVH, and will involve 20 intervention practices and 5 control practices (25 practices total). The intervention will consist of inviting and assisting eligible patients of intervention practices to be screened for CRC, providing academic detailing to intervention practice providers
