SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The IC Clearance Official, Regulatory Information Management Services, Office of Management, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

k. *Description of Request:* Pacific Gas and Electric Company (licensee) is requesting that its license for the Battle Creek Hydroelectric Project be amended to support the Battle Creek Salmon and Steelhead Restoration Project (Restoration Project). The Chinook salmon and steelhead are federally-listed species. The Restoration Project is a collaborative effort to restore fish habitat on Battle Creek and some of its tributaries through modification of the project facilities and operations, including instream flow releases. This collaborative effort is between PG&E, the U.S. Department of the Interior, Bureau of Reclamation, the U.S. Fish and Wildlife Service, the National Oceanic and Atmospheric Administration, National Marine Fisheries Service, and the California Department of Fish and Game.

The Restoration Project will reestablish approximately 42 miles total of prime salmon and steelhead habitat

in the North and South Forks of Battle Creek, plus an additional six miles of habitat on the tributaries of Battle Creek. The Restoration Project will be accomplished in three phases. The licensee is filing this license amendment application for approval and implementation of Phase 1A of the Restoration Project. Proposed work for Phase 1A includes fish passage improvements on North Fork Battle Creek by: (1) Installing fish screens and ladders at the North Battle Creek Feeder and Eagle Canyon Diversion Dams; (2) installing the 4,500-foot long Eagle Canyon Canal pipeline; (3) removing the Wildcat Diversion Dam and appurtenant conveyance systems; and (4) modifying the Asbury Diversion Dam by installing an upstream fish migration barrier and changing maintenance procedures to eliminate use of the low-level outlet.

The licensee has submitted the Battle Creek Salmon and Steelhead Restoration Project Final Environmental Impact Statement/Environmental Impact Report (EIS/EIR), prepared in July 2005, as part of its application. The referenced EIS/EIR was a collaborative effort to fulfill National Environmental Policy Act (NEPA) and California Environmental Quality Act requirements. The EIS/EIR was a collaborative effort between PG&E, the Bureau of Reclamation, California State Water Resources Control Board, California Bay-Delta Authority, and the Federal Energy Regulatory Commission (Commission). The Commission intends to use the 2005 EIS/EIR to meet the NEPA requirements under the proposed action to amend the Battle Creek Project. The EIS/EIR was previously public noticed on July 29, 2005 and the document is available for review at the Restoration Projects Web site (link: http://www.usbr.gov/mp/nepa/nepa_projdetails.cfm?Project_ID=99).
