k. *Description of Request*:

Appalachian Power Company (licensee) is requesting modifications to and an extended continuance of its current 45-day temporary variance of the minimum flow release requirement under license article 29 for the Smith Mountain Pumped Storage Hydroelectric Project. As a result of sustained low inflow conditions at the project and the need to conserve water, Appalachian Power Company, after consultation with state resource agencies and stakeholders, requests that it be allowed to modify and continue a temporary flow variance under several modifying conditions (see licensee's request filed August 25, 2008), until Smith Mountain Lake returns to normal operating conditions (an adjusted elevation of 795.0 feet).

Concurrent with this notice, the Commission granted the licensee's requests (see Order Granting Temporary Amendment of Minimum Flow Requirement per Article 29, Project No. 2210–177 and –180), but reserved authority to require changes to project operation based upon comments received from this public notice.
