Rooney, IRIS Staff, National Center for Environmental Assessment, U.S. EPA, 109 T.W. Alexander Drive, B243-01, Durham, NC 27711; telephone: 919-541-1492; facsimile: 919-541-0245; or e-mail: rooney.andrew@epa.gov.

SUPPLEMENTARY INFORMATION: This listening session is a new step in EPA's revised IRIS process, announced on April 10, 2008, for development of human health assessments for inclusion on IRIS. The new process is posted on the NCEA home page under the Recent Additions menu at <http://www.epa.gov/ncea>. Two listening sessions are scheduled under the new IRIS process. The first is during the public review of the draft assessment that includes only qualitative discussion. The second session is during the public review of the externally peer-reviewed draft assessment; if feasible, the completed draft of IRIS assessments will include both qualitative and quantitation elements. All IRIS assessments that are at the document development stage will follow the revised IRIS process, which includes the two listening sessions. However, when EPA initiated the new IRIS process, the draft assessment for Halogenated Platinum Salts and Platinum Compounds had already completed document development and been through several rounds of internal review. Therefore, EPA will only hold one listening session during the public review and comment period of the externally peer-reviewed draft.

Needs and Uses: The Communications Act requires the Commission to inspect the radio installation of large cargo ships and certain passenger ships at least once a year to ensure that the radio installation is in compliance with the requirements of the Communications Act. Additionally, the Communications Act requires the inspection of small passenger ships at least once every five years. The Safety Convention (to which the United States is a signatory) also requires an annual inspection. However, the Safety Convention permits an Administrator to entrust the inspections to either surveyors nominated for the purpose or to organizations recognized by it. Therefore, the United States can have other parties conduct the radio inspection of vessels for compliance with the Safety Convention. The Commission allows FCC-licensed technicians to conduct these inspections. FCC-licensed technicians certify that the ship passed an inspection and issue a safety certificate. These safety certificates (FCC Forms 806, 824, 827 and 829) indicate that the vessel complies with the Communications Act and the Safety Convention. These technicians are required to provide a summary of the results of the inspection in the ship's log. In addition, the vessel's owner, operator, or ship's master must certify in the ship's log that the inspection was
