Animal and Plant Health Inspection Service

Title: Viral Hemorrhagic Septicemia (VHS); Interstate Movement and Import Restrictions on Certain Live Fish.

OMB Control Number: 0579-0340.

Summary of Collection: The Animal Health Protection Act of 2002 is the primary Federal law governing the protection of animal health. The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is charged with disease prevention. APHIS regulations in 9 CFR, part 93 govern the importation of certain species of fish to prevent the introduction or spread of specific pests and diseases of aquaculture facilities within the United States. APHIS is establishing regulations to prevent the introduction of VHS into U.S. aquaculture facilities by controlling the movement of certain live fish species at risk of harboring VHS. VHS is listed as a notifiable disease by the World Organization for Animal Health. APHIS will use several forms to collect necessary information.

Need and Use of the Information: APHIS will collect the necessary information using the Interstate Certificate of Inspection (ICI); Permit for Movement of Restricted Animals VS Form 1-27; Cleaning and Disinfection Certificate; Application for Import or In-Transit Permit VS Form 17-129; Health Certificate and a 72-hour advance notification by the importer notifying the APHIS port veterinarian. If the information was collected less frequently or not collected at all, it would significantly cripple APHIS' ability to prevent the introduction of VHS into U.S. aquaculture facilities by controlling the movement of live fish at risk of harboring VHS virus.

Description of Respondents: Business or other for-profit; State, Local or Tribal Government.

Number of Respondents: 10.

Frequency of Responses:
Recordkeeping; Reporting: Annually.
Total Burden Hours: 1
