Proposed Information Collection; Comment Request; Atlantic Highly Migratory Species Recreational Landings Reports

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice.

SUPPLEMENTARY INFORMATION:

I. Abstract

Recreational catch reporting provides important data used to monitor catches of Atlantic highly migratory species (HMS) and supplements other existing data collection programs. The data collected through this program are

currently used for both domestic and international fisheries management and stock assessment purposes.

Atlantic bluefin tuna (BFT) catch reporting provides real-time catch information used to monitor the recreational BFT fishery. Under the Atlantic Tunas Convention Act of 1975 (ATCA, 16 U.S.C. 971), the United States is required to implement recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT), as necessary and appropriate, including a specified BFT quota. This program supports BFT quota monitoring and scientific research authorized under ATCA and the Magnuson-Stevens Fishery Conservation and Management Act (MSFMCA, 16 U.S.C. 1801 *et seq.*). Recreational anglers are required to report specific information regarding their catch after they land a BFT.

Atlantic billfish and swordfish are managed internationally by ICCAT and nationally under ATCA and the MSFMCA. This collection provides information needed to monitor the recreational limit established by ICCAT for Atlantic blue and white marlin, and the recreational catch of North Atlantic swordfish, which is applied to the ICCAT established U.S. quota. This collection also provides information on recreational landings of West Atlantic sailfish which is unavailable from established monitoring programs. The collection of sailfish catch information is authorized under MSFCMA for purposes of stock management.

II. Method of Collection

Respondents reporting BFT landings in all states (including the United States Virgin Islands and the Commonwealth of Puerto Rico) other than Maryland or North Carolina may use either an Internet Web site or an interactive voice response (IVR) telephone system. The respondents reporting Atlantic marlin, West Atlantic sailfish, or North Atlantic swordfish in all states (including the United States Virgin Islands and the Commonwealth of Puerto Rico) other than MD or NC may use either an Internet Web site or a toll-free telephone number. In MD and NC, a paper reporting system is used for all of the aforementioned species. Respondents in MD and NC must submit a landing card at a state reporting station. The states that participate in a landing card program must submit weekly reports and one annual report to NOAA to summarize landings and results to date.
