

Administrator to grant a waiver for an ethanol-gasoline blend greater than 10 percent and less than or equal to 15 percent by volume.

EPA also requests comment on:

(d) all legal and technical aspects regarding the possibility that a waiver might be granted, in a conditional or partial manner, such that the use of up to E15 would be restricted to a subset of gasoline vehicles or engines that would be covered by the waiver, while other vehicles or engines would continue using fuels with blends no greater than E10. EPA seeks comment on what measures would be needed to ensure that the fuel covered by the waiver (*i.e.* a partial or conditional waiver) is only used in that subset of vehicles or engines. EPA acknowledges that the issue of misfueling would be challenging in a situation where a conditional waiver is granted. To the extent a partial or conditional waiver may be appropriate, please provide comments on the legal and technical need for restrictions of this nature. Comments are also requested on how the Agency might define a partial or conditional waiver. For example, assuming there is sufficient technical basis, should the subset of vehicles or engines that is allowed to use the waived fuel be defined by model year of production, engine size, application (*e.g.*, highway vehicle vs. nonroad engine), or some other defining characteristic.

(e) Any education efforts that would be needed to inform the public about the new fuel that would be available if a waiver is granted. To address the possibility of a grant of a conditional or partial waiver, the Agency requests specific comments on public education measures that would be needed if the waiver allowed the fuel to be used only in a subset of existing vehicles or engines.

Commenters should include data or specific examples in support of their comments in order to aid the Administrator in determining whether to grant or deny the waiver request. In order for any testing programs evaluating emissions impacts, as well as other types of impacts (*i.e.*, catalyst, engine, fuel system durability, or onboard diagnostics), to be useful in EPA's evaluation of Growth Energy's waiver application, any mid-level ethanol blend testing or other analyses should consider such impacts across a range of engines and equipment (including the fuel systems) that are currently in service and that could be exposed to mid-level ethanol blends. Such testing and analyses should also assess the long-term impacts of such

blends. EPA specifically solicits the data and results from such testing and analyses.

Although it is not a specific criterion by which to evaluate a waiver request under section 211(f), any approved waiver could require program changes to accommodate this new fuel. EPA seeks comment on the effect of a potential waiver for ethanol blends above 10 percent and up to 15 percent on existing fuel programs (*e.g.*, gasoline detergent certification, protection of underground storage tanks, etc.) and on the gasoline production, distribution and marketing infrastructure. For example, would EPA need to modify its RFG and anti-dumping regulations to account for a higher blend? EPA also seeks comment on the dynamics of the blendwall concern raised by Growth Energy, the extent to which the use of an E15 blend would in practice help address this concern, and what additional steps would have to be taken to bring E15 to market should a waiver be granted.

DATES: The public teleconference will be held on Thursday May 7, 2009 from 1 p.m. to 2 p.m. (Eastern Time).

ADDRESSES: The teleconference will be conducted by telephone only.

FOR FURTHER INFORMATION CONTACT: Any member of the public who wants further information concerning the CASAC public teleconference may contact Dr. Holly Stallworth, Designated Federal Officer (DFO), EPA Science Advisory Board (1400F), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; via telephone/voice mail (202) 343-9867; fax (202) 233-0643; or e-mail at stallworth.holly@epa.gov. General information concerning the CASAC can be found on the EPA Web site at <http://www.epa.gov/casac>.

SUPPLEMENTARY INFORMATION:

Background: The Clean Air Scientific Advisory Committee (CASAC) was established under section 109(d)(2) of the Clean Air Act (CAA or Act) (42 U.S.C. 7409) as an independent scientific advisory committee. CASAC provides advice, information and recommendations on the scientific and technical aspects of air quality criteria and national ambient air quality standards (NAAQS) under sections 108 and 109 of the Act. The CASAC is a Federal advisory committee chartered under the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C., App. The CASAC will comply with the provisions of FACA and all appropriate SAB Staff Office procedures.

Section 109(d)(1) of the CAA requires that the Agency periodically review and revise, as appropriate, the air quality criteria and the NAAQS for the six "criteria" air pollutants, including particulate matter (PM). EPA conducts scientific assessments to determine both primary (health-based) and secondary (welfare-based) standards for each of these pollutants.

The CASAC PM Review Panel will hold a public teleconference on May 7, 2009 to review and approve draft letters reviewing three EPA draft documents supporting EPA's review of the PM National Ambient Air Quality Standard: (1) *Integrated Science Assessment for Particulate Matter—First External Review Draft, Dec 2008*; (2) *PM NAAQS: Scope and Methods Plan for Health Risk and Exposure Assessment (February 2009)*; and (3) *PM NAAQS: Scope and Methods Plan for Urban Visibility Impact Assessment (February 2009)*.

The CASAC PM Panel previously held a public meeting on April 1-2, 2009 (announced in 74 FR 7688-7689) to review these documents. The purpose of the May 7, 2009 teleconference is to

review and approve the CASAC PM Panel's draft letters on the above-referenced documents.

Additional information about the CASAC PM panel's review and advice in support of EPA's NAAQS review for PM can be found on the CASAC Web site at <http://yosemite.epa.gov/sab/sabproduct.nsf/>
