SUPPLEMENTARY INFORMATION:

I. Background: The UCX law (5 U.S.C. 8521-8525) requires SWAs to administer the UCX program in accordance with the same terms and conditions of the paying state's unemployment insurance law which apply to unemployed claimants who worked in the private sector. Each state agency needs to obtain certain military service information on claimants filing for UCX benefits to enable the state to determine their eligibility for benefits. As needed, state agencies may record or obtain required UCX information on the form developed by the Department of Labor, ETA 843, Request for Military Document and Information. The use of this form may be essential to the UCX claims process. Form ETA 841, Request for Determination of Federal Military Service and Wages, is no longer used by most states; it has become an optional form.

Information pertaining to the UCX claimant can only be obtained from the individual's military discharge papers, the appropriate branch of military service or the Department of Veterans' Affairs (formerly the Veterans' Administration). Without the claimant's military information, the state cannot adequately determine the UCX eligibility of ex-servicemembers and would not be able to properly administer the program.

II. Review Focus: The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- * Enhance the quality, utility, and clarity of the information to be collected; and

- * Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other

technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
