

a CWA general permit would place requirements on dischargers that are appropriate and reasonable. Furthermore, EPA believes that the RFA's framework and requirements provide the Agency with the best approach for the Agency's evaluation of the economic impact of general permits on small entities. While using the RFA framework to inform its assessment of whether permit requirements are appropriate and reasonable, EPA will also continue to ensure that all permits satisfy the requirements of the Clean Water Act. Accordingly, EPA has committed to operating in accordance with the RFA's framework and requirements during the Agency's issuance of CWA general permits (in other words, the Agency has committed that it will apply the RFA in its issuance of general permits as if those permits do qualify as "rules" that are subject to the RFA).

B. Application of RFA Framework to Proposed Issuance of CAFO General Permit for New Mexico (Except Indian Country)

EPA has determined, consistent with the discussion in section IV.B above, that the proposed issuance of today's proposed permit would not affect a substantial number of small entities. Although general permits are considered to be adjudications and not rules and therefore not legally subject to the regulatory flexibility act, the Agency as a matter of policy is evaluating on an individual basis whether or not a specific general permit would have a significant economic impact on a substantial number of small entities. Upon considering EPA's current guidance, entitled Final Guidance for EPA Rulewriters: Regulatory Flexibility Act as Amended by the Small Business Regulatory Enforcement and Fairness Act, EPA concludes that since this general permit affects less than 100 small entities at any one time, EPA believes that it does not have a significant economic impact on a substantial number of small entities.
