SUPPLEMENTARY INFORMATION:

Background and Purpose

The lift boat CAITLIN will be used for oil exploration. The horizontal distance between the stem of the vessel and masthead light is permitted to be 108'. Placing the masthead light at the horizontal distance from the stem of the vessel as required by Annex I, paragraph 3(d) of the 72 COLREGS, and Annex I, Section 84.05(d) of the Inland Rules Act, would result in a masthead light location that would interfere with crane operations. In addition, the sidelights may be located on the outermost edges of the top of the pilothouse, 7' 6" from the centerline. Placing the sidelights in the locations required by Annex I, paragraph 3(b) of 72 COLREGS, and Annex I, paragraph 84.05(b) of the Inland Rules Act would expose the sidelights to probable damage from the working machinery around the forward legs of the vessel.

The Certificate of Alternative Compliance allows for the horizontal separation of the masthead light from the stem of the vessel to deviate from the requirements of Annex I, paragraph 3(d) of 72 COLREGS, and Annex I, Section 84.05(d) of the Inland Rules Act. In addition, this Certificate of Alternative Compliance allows for the placement of the sidelights to deviate from requirements set forth in Annex I, paragraph 3(b) of 72 COLREGS, and Annex I, paragraph 84.05(b) of the Inland Rules Act.

This notice is issued under authority of 33 U.S.C. 1605(c) and 33 CFR 81.18.

Dated: July 27, 2009.

J.W. Johnson,

Commander, U.S. Coast Guard, Chief, Inspections and Investigations Branch, By Direction of the Commander Eighth Coast Guard District.
