

## New Tolerance Exemption

PP 9E7572. (EPA-HQ-OPP-2009-0043). Joint Inerts Task Force, Cluster Support Team 11, EPA Co. No. 84944, c/o CropLife America, 1156 15th St., NW., Suite 400, Washington, DC 20005, proposes to establish an exemption from the requirement of a tolerance under 40 CFR 180.910 for residues of sodium and ammonium naphthalenesulfonate formaldehyde condensates, including: CAS Reg. Nos. 68425-94-5 (residues, petroleum, catalytic reformer fractionator, sulfonated, polymers with formaldehyde, sodium salts), 9069-80-1 (naphthalenesulfonic acid, ammonium salt polymer with formaldehyde), 9084-06-4 (naphthalenesulfonic acid, polymer with formaldehyde, sodium salt), 36290-04-7 (2-naphthalenesulfonic acid, polymer with formaldehyde, sodium salt), 91078-68-1 (naphthalenesulfonic acids, reaction products with formaldehyde, sodium salts), 141959-43-5 (naphthalenesulfonic acid, methyl-sodium salt with formaldehyde), and 9008-63-3 (naphthalenesulfonic acid, sodium salt polymer with formaldehyde) when used as pesticide inert ingredients in pesticide formulations. Because this petition is a request for an exemption from the requirement of a tolerance, no analytical method is required. Contact: Elizabeth Fertich, (703) 347-8560; [fertich.elizabeth@epa.gov](mailto:fertich.elizabeth@epa.gov).

## List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 5, 2009.

## FEDERAL COMMUNICATIONS COMMISSION

### Public Information Collections

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested.

**SUMMARY:** The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other

Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, 44 U.S.C. 3501-3520. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

**DATES:** Written PRA comments should be submitted on or before October 19, 2009. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget (OMB), (202) 395-5887, or via fax at (202) 395-5167, or via the Internet at [Nicholas\\_A.Fraser@omb.eop.gov](mailto:Nicholas_A.Fraser@omb.eop.gov) and to Cathy Williams, Federal Communications Commission (FCC), Room 1-C823. To submit your comments by e-mail send them to: [PRA@fcc.gov](mailto:PRA@fcc.gov) and/or [Cathy.Williams@fcc.gov](mailto:Cathy.Williams@fcc.gov).

**FOR FURTHER INFORMATION CONTACT:** For additional information about the information collection(s), contact Cathy Williams at (202) 418-2918 or send an e-mail to [PRA@fcc.gov](mailto:PRA@fcc.gov) and/or [Cathy.Williams@fcc.gov](mailto:Cathy.Williams@fcc.gov).

### SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-1106.

Title: Licensing and Service Rules for Vehicle Mounted Earth Stations (VMES).

Form No.: Not Applicable.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 10 respondents; 40 responses.

Estimated Time per Response: 1 hour - 1.5 hours.

Frequency of Response: On occasion reporting requirement; Recordkeeping requirement; Third party disclosure requirement.

**Obligation to Respond:** Required to obtain or retain benefits. The Commission has statutory approval for the information collection requirements under Sections 1, 4(i), 4(j), 7(a), 301, 303(c), 303(f), 303(g), 303(r), 303(y) and 308 of the Communications Act of 1934, as amended, 47 U.S.C. Sections 151, 154(i), 154(j), 157(a), 301, 303(c), 303(f), 303(g), 303(r), 303(y), and 308.

Total Annual Burden: 171 hours.

Total Annual Cost: \$101,300 annual costs.

Privacy Act Impact Assessment: No impact(s).

**Nature and Extent of Confidentiality:** There is no need for confidentiality pertaining to the information collection requirements in this collection.

**Needs and Uses:** On July 31, 2009, the Federal Communications Commission ("Commission") released a Report and Order titled, "In the Matter of Amendment of Parts 2 and 25 of the Commission's Rules to Allocate Spectrum and Adopt Service Rules and Procedures to Govern the Use of Vehicle-Mounted Earth Stations in Certain Frequency Bands Allocated to the Fixed-Satellite Service," IB Docket No. 07-101, FCC 09-64 (hereinafter referred to as "VMES Report and Order").

The VMES Report and Order adopts Part 2 allocation rules and Part 25 technical and licensing rules for a new domestic Ku-band VMES service. VMES service has the potential to deliver advanced mobile applications through satellite technology, including broadband, which will be beneficial for public safety and commercial purposes.

The PRA information collection requirements contained in the VMES Report and Order are as follows:

1. 47 CFR 25.226(b)(1)(i) OR 47 CFR 25.226(b)(1)(ii)

(i) Any VMES applicant filing an application pursuant to paragraph (a)(1) of this section shall file three tables showing the off-axis EIRP level of the proposed earth station antenna in the direction of the plane of the GSO; the co-polarized EIRP in the elevation plane, that is, the plane perpendicular to the plane of the GSO; and cross-polarized EIRP. Each table shall provide the EIRP level at increments of 0.1° for angles between 0° and 10° off-axis, and at increments of 5° for angles between 10° and 180° off-axis.

OR

2. (ii) A VMES applicant shall include a certification, in Schedule B, that the VMES antenna conforms to the gain

pattern criteria of § 25.209(a) and (b), that, combined with the maximum input power density calculated from the EIRP density less the antenna gain, which is entered in Schedule B, demonstrates that the off-axis EIRP spectral density envelope set forth in paragraphs (a)(1)(i)(A) through (a)(1)(i)(C) of this section will be met under the assumption that the antenna is pointed at the target satellite.

3. 47 CFR 25.226(b)(1)(iii)

(iii) A VMES applicant proposing to implement a transmitter under paragraph (a)(1)(ii)(A) of this section shall provide a certification from the equipment manufacturer stating that the antenna tracking system will maintain a pointing error of less than or equal to 0.2° between the orbital location of the target satellite and the axis of the main lobe of the VMES antenna and that the antenna tracking system is capable of ceasing emissions within 100 milliseconds if the angle between the orbital location of the target satellite and the axis of the main lobe of the VMES antenna exceeds 0.5°.

4. 47 CFR 25.226(b)(1)(iv)(A), (B)

A VMES applicant proposing to implement a transmitter under paragraph (a)(1)(ii)(B) of this section shall:

(A) declare, in its application, a maximum antenna pointing error and demonstrate that the maximum antenna pointing error can be achieved without exceeding the off-axis EIRP spectral-density limits in paragraph (a)(1)(i) of this section; and (B) demonstrate that the VMES transmitter can detect if the transmitter exceeds the declared maximum antenna pointing error and can cease transmission within 100 milliseconds if the angle between the orbital location of the target satellite and the axis of the main lobe of the VMES antenna exceeds the declared maximum antenna pointing error, and will not resume transmissions until the angle between the orbital location of the target satellite and the axis of the main lobe of the VMES antenna is less than or equal to the declared maximum antenna pointing error.

5. 47 CFR 25.226(b)(2)(i), (ii), (iii), (iv)

A VMES applicant proposing to implement a transmitter under paragraph (a)(2) of this section and using off-axis EIRP spectral-densities in excess of the levels in paragraph (a)(1)(i) of this section shall provide the following certifications and demonstration as exhibits to its earth station application:

(i) A statement from the target satellite operator certifying that the proposed operation of the VMES has the potential to create harmful interference to satellite

networks adjacent to the target satellite(s) that may be unacceptable.

(ii) A statement from the target satellite operator certifying that the power-density levels that the VMES applicant provided to the target satellite operator are consistent with the existing coordination agreements between its satellite(s) and the adjacent satellite systems within 6° of orbital separation from its satellite(s).

(iii) A statement from the target satellite operator certifying that it will include the power-density levels of the VMES applicant in all future coordination agreements.

(iv) A demonstration from the VMES operator that the VMES system is capable of detecting and automatically ceasing emissions within 100 milliseconds when the transmitter exceeds the off-axis EIRP spectral-densities supplied to the target satellite operator.

6. 47 CFR 25.226(b)(3)

A VMES applicant proposing to implement a VMES system under paragraph (a)(3) of this section and using variable power-density control of individual simultaneously transmitting co-frequency VMES earth stations in the same satellite receiving beam shall provide the following certifications and demonstration as exhibits to its earth station application:

(i) The applicant shall make a detailed showing of the measures it intends to employ to maintain the effective aggregate EIRP-density from all simultaneously transmitting co-frequency terminals operating with the same satellite transponder at least 1 dB below the EIRP-density limits defined in paragraphs (a)(1)(i)(A)–(C) of this section. In this context the term “effective” means that the resultant co-polarized and cross-polarized EIRP-density experienced by any GSO or non-GSO satellite shall not exceed that produced by a single VMES transmitter operating at 1 dB below the limits defined in paragraphs (a)(1)(i)(A)–(C) of this section. The International Bureau will place this showing on Public Notice along with the application.

(ii) An applicant proposing to implement a VMES under (a)(3)(ii) of this section that uses off-axis EIRP spectral-densities in excess of the levels in paragraph (a)(3)(i) of this section shall provide the following certifications, demonstration and list of satellites as exhibits to its earth station application:

(A) A detailed showing of the measures the applicant intends to employ to maintain the effective aggregate EIRP-density from all simultaneously transmitting co-

frequency terminals operating with the same satellite transponder at the EIRP-density limits supplied to the target satellite operator. The International Bureau will place this showing on Public Notice along with the application.

(B) A statement from the target satellite operator certifying that the proposed operation of the VMES has the potential to create harmful interference to satellite networks adjacent to the target satellite(s) that may be unacceptable.

(C) A statement from the target satellite operator certifying that the aggregate power density levels that the VMES applicant provided to the target satellite operator are consistent with the existing coordination agreements between its satellite(s) and the adjacent satellite systems within 6° of orbital separation from its satellite(s).

(D) A statement from the target satellite operator certifying that it will include the aggregate power-density levels of the VMES applicant in all future coordination agreements.

(E) A demonstration from the VMES operator that the VMES system is capable of detecting and automatically ceasing emissions within 100 milliseconds when an individual transmitter exceeds the off-axis EIRP spectral-densities supplied to the target satellite operator and that the overall system is capable of shutting off an individual transmitter or the entire system if the aggregate off-axis EIRP spectral-densities exceed those supplied to the target satellite operator.

(F) An identification of the specific satellite or satellites with which the VMES system will operate.

(iii) The applicant shall acknowledge that it will maintain sufficient statistical and technical information on the individual terminals and overall system operation to file a detailed report, one year after license issuance, describing the effective aggregate EIRP-density levels resulting from the operation of the VMES system.

7. 47 CFR 25.226(a)(5), (b)(6)

Applicant shall include in application point of contact with authority and ability to cease all emissions from VMES terminals.

8. 47 CFR 25.226 (a)(6), (b)(7)

VMES licensee shall provide data (record of vehicle location, transmit frequency, channel bandwidth and satellite used for each relevant VMES transmitter) to Commission, NTIA, FSS operator, FS operator, or frequency coordinator within 24 hours upon request.

The information collection requirements accounted for in this

collection are necessary to prevent regulatory uncertainty with respect to VMES and other satellite services that operate in the Ku-band within the United States. Prior to this rulemaking, the lack of rules for VMES posed an administrative burden on those entities attempting to provide VMES-type services and on Commission staff because such services could be granted only through the use of waivers and Special Temporary Authority (STA) authorizations for a six-month period of time. The approval of fifteen-year licenses for VMES operators significantly reduces the burden imposed upon both licensees and Commission staff who review and approve the waivers and STAs. Furthermore, without such information the Commission would not be able to take the necessary measures to prevent harmful interference to satellite services from VMES. Finally, the Commission would not be able to advance its goals of managing spectrum efficiently and promoting broadband technologies to benefit American consumers throughout the United States.

Federal Communications Commission.

## FEDERAL COMMUNICATIONS COMMISSION

### Public Information Collection

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested.

**SUMMARY:** The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, 44 U.S.C. 3501-3520. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the

Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

**DATES:** Persons wishing to comment on this information collection should submit comments on October 19, 2009. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget (OMB), (202) 395-5887, or via fax at (202) 395-5167, or via the Internet at [Nicholas.A.Fraser@omb.eop.gov](mailto:Nicholas.A.Fraser@omb.eop.gov) and to Cathy Williams, Federal Communications Commission (FCC), Room 1-C823 Washington, D.C. 20554. To submit your comments by e-mail send them to: [PRA@fcc.gov](mailto:PRA@fcc.gov) and to [Cathy.Williams@fcc.gov](mailto:Cathy.Williams@fcc.gov).

**FOR FURTHER INFORMATION CONTACT:** For additional information about the information collection(s) send an e-mail to [PRA@fcc.gov](mailto:PRA@fcc.gov) and/or [Cathy.Williams@fcc.gov](mailto:Cathy.Williams@fcc.gov) or contact Cathy Williams on (202) 418-2918.

#### SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0580.  
Title: Section 76.1710, Operator Interests in Video Programming.  
Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 1,500 respondents; 1,500 responses.

Estimated Time Per Response: 15 hours.

Frequency of Response: Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 Section 154(i) of the Communications Act of 1934, as amended.

Total Annual Burden: 22,500 hours.  
Total Annual Costs: None.

Privacy Impact Assessment(s): No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality and respondents are not being asked to submit confidential information to the Commission.

Needs and Uses: 47 CFR Section 76.1710 requires cable operators to maintain records in their public file for a period of three years regarding the nature and extent of their attributable interests in all video programming services. The records must be made available to members of the public, local franchising authorities and the Commission on reasonable notice and during regular business hours. The records will be reviewed by local franchising authorities and the Commission to monitor compliance with channel occupancy limits in respective local franchise areas.
