

establish conditions that allow all solvent-contaminated wipes, no matter which solvent they contain, except perhaps tetrachloroethylene, to be sent to a Subtitle D municipal or industrial landfill unit subject to, or otherwise meeting, the landfill requirements in § 258.40(a)(2) and (b). This approach could be simpler since the generator would not need to separate his wipes and send them to separate disposal locations. We are requesting comment on these two approaches.

The risk analysis using 90th percentile results also indicates that tetrachloroethylene has a risk potential in both unlined landfills and composite lined landfills for both solvent-contaminated wipes and laundry sludge (using a cancer risk criterion of 1×10^{-5}). Using the higher end cancer risk value in our analysis, the ratio of the ELLR to the RB-MLL for tetrachloroethylene was 1.1, while using the lower end cancer risk value the ratio was 0.9. If we rounded the numbers, the ratios would both be 1.0. Since we generally used a conservative approach in the risk analysis, we are asking for comment on whether our results represent a risk of concern.

Even though the risk may be borderline, we are considering alternative management conditions for tetrachloroethylene to address this potential risk. One approach is to prohibit disposal of tetrachloroethylene, either on solvent-contaminated wipes or in laundry sludge that exhibits the tetrachloroethylene toxicity characteristic (TC) in nonhazardous waste landfills. Another approach could be eliminating wipes contaminated with tetrachloroethylene from the scope of the final exclusions for solvent-contaminated wipes, or eliminating wipes contaminated with tetrachloroethylene that exhibit the TC in the scope of the final exclusions for solvent-contaminated wipes. We are requesting comment on these approaches or other possible alternatives.

IV. Conclusion

We will consider comments received on the revised risk analysis and then modify the analysis as appropriate. The final risk analysis, comments submitted in response to Section III of this notice, and comments submitted in response to the November 2003 proposed rule will be considered as we develop a final rule for the management of solvent-contaminated wipes.

Readers should note that other than the specific issues identified in this NODA, no other issues discussed in or related to the November 20, 2003,

proposed rule are open for further comment and the Agency will not respond to any comments received on any issues not identified in this NODA.

Dated: October 15, 2009.

Mathy Stanislaus,

Assistant Administrator, Office of Solid Waste and Emergency Response.

BILLING CODE 6560-50-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA-2008-0020; Internal Agency Docket No. FEMA-B-1075]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule.

SUMMARY: Comments are requested on the proposed Base (1% annual-chance) Flood Elevations (BFEs) and proposed BFE modifications for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the proposed regulatory flood elevations for the reach described by the downstream and upstream locations in the table below. The BFEs and modified BFEs are a part of the floodplain management measures that the community is required either to adopt or show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, these elevations, once finalized, will be used by insurance agents, and others to calculate appropriate flood insurance premium rates for new buildings and the contents in those buildings.

DATES: Comments are to be submitted on or before January 25, 2010.

ADDRESSES: The corresponding preliminary Flood Insurance Rate Map (FIRM) for the proposed BFEs for each community is available for inspection at the community's map repository. The respective addresses are listed in the table below.

You may submit comments, identified by Docket No. FEMA-B-1075, to Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW.,

Washington, DC 20472, (202) 646-2820, or (e-mail) kevin.long@dhs.gov.

FOR FURTHER INFORMATION CONTACT:

Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-2820, or (e-mail) kevin.long@dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) proposes to make determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

Comments on any aspect of the Flood Insurance Study and FIRM, other than the proposed BFEs, will be considered. A letter acknowledging receipt of any comments will not be sent.

National Environmental Policy Act. This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601-612, a regulatory flexibility analysis is not required.

Executive Order 12866, Regulatory Planning and Review. This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866, as amended.

Executive Order 13132, Federalism. This proposed rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This proposed rule meets the

applicable standards of Executive Order 12988.

Accordingly, 44 CFR part 67 is proposed to be amended as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

§ 67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

Flooding source(s)	Location of referenced elevation**	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)		Communities affected
		Effective	Modified	
Peoria County, Illinois, and Incorporated Areas				
Illinois River	Peoria/Fulton County Boundary	+455	+454	Unincorporated Areas of Peoria County, City of Pekin, City of Peoria, Village of Bartonville, Village of Kingston Mines, Village of Mapleton.
	Approximately 1.27 Miles downstream of the Peoria and Pekin Union Railroad.	+459	+458	

* National Geodetic Vertical Datum.

+ North American Vertical Datum.

Depth in feet above ground.

^ Mean Sea Level, rounded to the nearest 0.1 meter.

** BFEs to be changed include the listed downstream and upstream BFEs, and include BFEs located on the stream reach between the referenced locations above. Please refer to the revised Flood Insurance Rate Map located at the community map repository (see below) for exact locations of all BFEs to be changed.

Send comments to Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472.

[Docket No. FWS-R6-ES-2009-0064]

[MO 922105 0083-B2]

Endangered and Threatened Wildlife and Plants; 90-day Finding on a Petition To List the American Dipper in the Black Hills of South Dakota as Threatened or Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of 90-day petition finding.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a 90-day finding on a petition to list the distinct population segment (DPS) of American dipper (*Cinclus mexicanus*

unicolor) in the Black Hills of South Dakota as threatened or endangered and designate critical habitat under the Endangered Species Act of 1973, as amended (Act). For the purposes of this finding, we evaluated whether the petition presents substantial information to indicate whether the petitioned entity (the American dipper in the Black Hills of South Dakota) is a listable entity. Based on our review of the best available scientific and commercial information, we conclude that the American dipper in the Black Hills of South Dakota is not a listable entity under the Act. Because the petition did not present substantial information that the American dipper in the Black Hills of South Dakota is a DPS, we did not evaluate whether the information contained in the petition regarding threats was substantial. Therefore, we will not initiate a status review to determine if listing this subspecies is warranted in response to this petition. However, the public may submit to us new information concerning the subspecies, its status, or threats to it at any time.

DATES: You may submit new information concerning this subspecies for our consideration at any time.

ADDRESSES: This finding is available on the Internet at <http://www.regulations.gov>. Supporting

documentation we used in preparing this finding is available for public inspection, by appointment, during normal business hours at the South Dakota Ecological Services Office, U.S. Fish and Wildlife Service, 420 South Garfield Avenue, Suite 400, Pierre, SD 57501. Please submit any new information, materials, comments, or questions concerning this finding to the above address.

FOR FURTHER INFORMATION CONTACT: Pete Gober, Field Supervisor, South Dakota Ecological Services Office (see **ADDRESSES** section) (telephone 605-224-8693). If you use a telecommunications device for the deaf (TDD), call the Federal Information Relay Service (FIRS) at 800-877-8339.

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(A) of the Act (16 U.S.C. 1531 *et seq.*) requires that we make a finding on whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information indicating that the petitioned action may be warranted. We are to base this finding on information provided in the petition, supporting information submitted with the petition, and information otherwise available in our files at the time we make the determination. To the
