Title: Landfill Methane Outreach Program (Renewal).

ICR Numbers: EPA ICR Number 1849.05, OMB Control Number 2060-0446.

ICR Status: This ICR was discontinued on July 31, 2007. EPA is reinstating the previously approved ICR. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in Title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Landfill Methane Outreach Program (LMOP), created by EPA as part of the Climate Change Action Plan, is a voluntary program designed to encourage and facilitate the development of environmentally and economically sound landfill gas (LFG) energy projects across the United States in order to reduce methane emissions from landfills. LMOP does this by educating local governments and communities about the benefits of LFG recovery and use; building partnerships between state agencies, industry, energy service providers, local communities, and other stakeholders interested in developing this valuable resource in their community; and providing tools to evaluate LFG energy (LFGE) potential. LMOP signs voluntary Memoranda of Understanding (MOU) with these organizations to enlist their support in promoting cost-effective LFG utilization. The information collection includes completion and submission of the MOU, and annual completion and submission of information forms that include basic information on landfill gas energy projects with which the organizations are involved. The information collection also includes a one-time effort to update the LMOP Landfill and Landfill Gas Energy Project Database. The information collection is to be utilized to maintain up-to-date data and information about LMOP Partners and landfill gas energy projects with which they are involved. The data will also be used by the public to assess LFGE

project development opportunities in the United States. In addition, the information collection will assist LMOP in evaluating the reduction of methane emissions from landfills. Responses to the information collection are voluntary.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, and disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Landfill owners and operators (both public and private), landfill gas energy project developers, manufacturers and suppliers of landfill gas energy equipment, utilities, industries using landfill gas energy, state agencies involved in energy, air pollution, economic development and solid waste management, and non-profits involved in the solid waste management, public works, local government and renewable energy sectors.

Estimated Number of Respondents: 1,279.

Frequency of Response: Initially, occasionally, annually.

Estimated Total Annual Hour Burden: 5,887.

Estimated Total Annual Cost: \$344,827, which includes \$1,342 in annualized O&M costs.

Changes in the Estimates: There is an increase of 4,354 hours in the total estimated annual respondent burden compared with that identified in the ICR previously approved by OMB. This increase reflects a large growth in the number of LMOP Partners since the last renewal. Since the last ICR renewal, LMOP no longer collects information annually from Energy, State, and non-developer Industry Partners, the information forms have been simplified into pre-populated spreadsheets, and other collection efficiencies have been implemented such as the option to submit MOUs electronically. As a result

of these changes, the average number of hours per Partner has decreased, but the total hourly burden for LMOP Partners still increased because of an increase in the number of Partners. For perspective on the magnitude of Partner growth, there were 365 Partners at the end of 2003 when the ICR was last renewed, whereas there were 675 Partners as of July 2007. This indicates an 85% increase in Partners since the last renewal. The remainder of the increase in total hourly burden comes from a planned initiative to collect critical landfill data from 1,000 additional landfill owners and operators. These data are necessary in order to better respond to public data requests and evaluate the potential of future LFGE opportunities. This type of data collection has not occurred during LMOP's history. This change is the result of a program change.

Dated: February 18, 2009.

John Moses,

Acting Director, Collection Strategies Division.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Submitted for Review to the Office of Management and Budget

February 17, 2009.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501-3520. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of

information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before April 27, 2009. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, (202) 395-5887, or via fax at 202-395-5167 or via internet at Nicholas.A.Fraser@omb.eop.gov and to Judith-B.Herman@fcc.gov, Federal Communications Commission, or an e-mail to PRA@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information, contact Judith B. Herman at 202-418-0214 or via the Internet at Judith-B.Herman@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0999.

Title: Section 20.19, Hearing Aid-Compatible Mobile Handsets Annual Reporting (Hearing Aid Compatibility Act).

Form No.: FCC Form 655—electronic only.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 925 respondents; 925 responses.

Estimated Time per Response: 1–3 hours.

Frequency of Response: Annual reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for these information collections is contained in 47 U.S.C. Sections 154(i), 303(r), and 610.

Total Annual Burden: 12,525 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: In submitting the information requested in the annual reports, respondents may need to disclose confidential information to satisfy the requirements. However, covered entities would be free to request that such materials submitted to the Commission be withheld from public inspection under 47 CFR 0.459 of the Commission's rules. The Commission's rules provide for requesting that confidential treatment be afforded particular materials that the requesting party identifies and submission of those materials (for

review by the Commission) for which a party seeks confidential treatment. This same treatment is available for licensing applications filed in ULS and other reports that are filed electronically.

Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) after this 60-day comment period in order to obtain its full three year clearance. The Commission is requesting a revision of this information collection. The Commission is reporting a decrease in respondents since the last submission to OMB because manufacturers have already filed their January 15, 2009 reports. Therefore, each respondent now needs to file only one report per year. Starting July 15, 2009, all annual reports filed by service providers and manufacturers will be submitted using electronic FCC Form 655.

The Commission is implementing a mandatory electronic filing requirement for all manufacturers and service providers. The Commission is eliminating the use of paper-based annual reports and will require annual reports filed by manufacturers and service providers to be submitted using electronic FCC Form 655 beginning July 15, 2009. Use of the electronic FCC Form 655 will help filers ensure that their reports include all of the required information; will facilitate the Commission's compilation of data from the reports; and will decrease the paperwork burden on all respondents (service providers and manufacturers). The reporting criteria will assist the Commission staff in monitoring the progress of implementation by phone manufacturers and wireless service providers, and it will provide valuable information to the public concerning hearing aid-compatible handsets. The annual reports will permit the Commission to continue to stay abreast of ongoing standards work and other pertinent information associated with achieving digital wireless compatibility with hearing aids and cochlear implants. This information will help to ensure that the Commission's decisions relating to hearing aid compatibility with wireless phones are fair to all involved and reflect the actual status of technology. The technical standard for hearing aid compatibility is required by the Hearing Aid Compatibility (HAC) Act of 1988, and will be used by covered entities and the Commission as a compliance guide.

The Commission adopted and released a First Report and Order on February 28, 2008 (73 FR 25566) in which the Commission modified the deployment benchmarks for hearing aid-

compatible phones, and imposed new requirements on manufacturers and service providers to ensure their product lines are current and include handset models with varying levels of functionality and are periodically refreshed. The Commission also required manufacturers and service providers to continue to file reports on the status of their compliance with these requirements, and it modified the content and timing of these reports (service providers were required to file the new reports annually beginning on January 15, 2009 and subsequently thereafter, and manufacturers also filed their reports on January 15, 2009 and then are required to file annually thereafter beginning on July 15, 2009). The requirement to provide certain information in conjunction with product labeling remains, although the details of the information required have changed slightly, especially with regard to phones that have Wi-Fi air interface capability. Finally, the Commission required manufacturers and service providers which already have public Web sites to publish up-to-date information on their Web sites regarding their hearing aid-compatible models and to keep that information current.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712-01-P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than March 11, 2009.

A. Federal Reserve Bank of Minneapolis (Jacqueline G. King, Community Affairs Officer) 90
