SUPPLEMENTARY INFORMATION:

Background and Purpose

We published a notice of proposed rulemaking (NPRM) in the **Federal Register** on December 16, 2008 (73 FR 76295), entitled “Vessel Requirements for Notices of Arrival and Departure, and Automatic Identification System.” In it we stated our intention to hold a public meeting, and to publish a notice to announce the location and date of the public meeting. 73 FR 76296. In this notice, we announce an additional public meeting, to the one previously announced for March 5, 2009, in Washington, DC (74 FR 7534), to receive comments on this proposed rule.

In the NPRM, we proposed to expand the applicability of Notice of Arrival and Departure (NOAD) and Automatic Identification System (AIS) requirements to more commercial vessels, modify NOAD reporting requirements, establish a mandatory method for electronic data submission and establish a separate requirement for certain vessels to submit notices of departure. The proposed rulemaking would also clarify existing AIS requirements and extend the applicability of AIS requirements to additional vessels and beyond Vessel Traffic Service areas to all U.S. navigable waters.

You may view the NPRM in our online docket, in addition to supporting

documents prepared by the Coast Guard (Regulatory Analysis & Initial Regulatory Flexibility Analysis, Valuing Mortality Risk Reductions in Homeland Security Regulatory Analyses—Final Report June 2008, and an Environmental Checklist), and comments submitted thus far by going to <http://www.regulations.gov>. Once there, select the Advanced Docket Search option on the right side of the screen, insert USCG-2005-21869 in the Docket ID box, press Enter, and then click on the item in the Docket ID column. If you do not have access to the Internet, you may view the docket by visiting the Docket Management Facility in Room W12-140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. We have an agreement with the Department of Transportation to use the Docket Management Facility.

We encourage you to participate in this rulemaking by submitting comments either orally at the meeting or in writing. If you bring written comments to the meeting, you may submit them to Coast Guard personnel specified at the meeting to receive written comments. These comments will be submitted to our online public docket. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided.

Anyone can search the electronic form of comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). SUPPLEMENTARY INFORMATION:

Background

The regulations implementing the FMP are prepared by the Mid-Atlantic Fishery Management Council (Council) and appear at 50 CFR part 648, subparts A and J. Regulations requiring annual specifications are found at § 648.160. The management unit for bluefish (*Pomatomus saltatrix*) is U.S. waters of the western Atlantic Ocean.

The FMP requires that the Council recommend, on an annual basis, total allowable landings (TAL) for the fishery, consisting of a commercial quota and recreational harvest limit (RHL). A research set aside (RSA) quota is deducted from the bluefish TAL (after any applicable transfer) in an amount proportional to the percentage of the overall TAL as allocated to the commercial and recreational sectors. The annual review process for bluefish requires that the Council's Bluefish Monitoring Committee (Monitoring Committee) and Scientific and Statistical Committee (SSC) review and make recommendations based on the best available data, including, but not

limited to, commercial and recreational catch/landing statistics, current estimates of fishing mortality, stock abundance, discards for the recreational fishery, and juvenile recruitment. Based on the recommendations of the Monitoring Committee and SSC, the Council makes a recommendation to the Northeast Regional Administrator (RA). This FMP is a joint plan with the Atlantic States Marine Fisheries Commission (Commission); therefore, the Commission meets during the annual specification process to adopt complementary measures.

The Council's recommendations must include supporting documentation concerning the environmental, economic, and social impacts of the recommendations. NMFS is responsible for reviewing these recommendations to assure they achieve the FMP objectives, and may modify them if they do not. NMFS then publishes proposed specifications in the **Federal Register**. After considering public comment, NMFS will publish final specifications in the **Federal Register**.

In July 2008, the Monitoring Committee and SSC met to discuss the updated estimates of bluefish stock biomass and project fishery yields for 2009. In August 2008, the Council approved the SSC and Monitoring Committee's recommendations and the Commission's Bluefish Board (Board) adopted complementary management measures.

Proposed Specifications

Updated Model Estimates

According to Amendment 1 to the FMP (Amendment 1), overfishing for bluefish occurs when F exceeds the fishing mortality rate that allows maximum sustainable yield (F_{MSY}), or the maximum F threshold to be achieved. The stock is considered overfished if the biomass (B) falls below the minimum biomass threshold, which is defined as $1/2 B_{MSY}$. Amendment 1 also established that the long-term target F is 90 percent of F_{MSY} ($F_{MSY} = 0.19$, therefore $F_{target} = 90$ percent of $F_{MSY} = 0.17$), and the long-term target B is $B_{MSY} = 324$ million lb (146,964 mt). The rebuilding plan established through Amendment 1 stipulates that the target fishing mortality rate (F_{target}) in 2009 be set at $F = 0.31$ (based upon earlier estimates of F_{MSY} , which was updated by the 41st Stock Assessment Review Committee (SARC-41) in 2005), or the status quo fishing mortality rate (F_{2007}), whichever is less.

An age-structured assessment program (ASAP) model for bluefish was approved by SARC-41 in 2005 to
