SUPPLEMENTARY INFORMATION:

Authority and Background

Any strategy to realize the goal of the President and the Secretary of Energy (Secretary)—to achieve 83-percent reductions in energy use by the year 2050—must address the energy performance of the buildings sector. Increases in stringency to building energy codes, along with increased adoption by states and localities and paired with rigorous compliance verification, can provide significant reductions in building energy use. This is consistent with section 304(d) and (e) of the Energy Conservation and Production Act which requires DOE to provide technical and financial assistance to states. (42 U.S.C. 6833(d) and (e))

A number of states are in the process of, or planning to, update, implement, and enforce their building energy codes. Further, many states will implement plans to assess and improve compliance with their updated codes, in response to assurances received by their governors in response to the American Recovery and Reinvestment Act of 2009 (Pub. L. 111-5), of which the Secretary was notified. This presents a unique opportunity to increase current efforts to ensure that states, municipalities, and local governments, are able to adopt the latest energy codes and increase compliance rates.

In view of the above, DOE believes it is important to provide interested parties with an opportunity to submit information they feel will assist DOE in compiling information.

Public Participation

A. Submission of Information

DOE will accept information in response to this notice under the timeline provided in the **DATES** section above. Information submitted to the Department by e-mail should be provided in WordPerfect, Microsoft Word, PDF, or text file format. B. Issues on Which DOE Seeks Information

DOE is particularly interested in receiving information on the following issues/topics:

(1) Problems, issues, and barriers to the adoption, implementation, enforcement, and improved compliance with improved building energy codes.

(2) Training needed for designers, builders, code officials, owners, and others to support upgraded codes to meet Standard 90.1-2007 (or code that achieves equivalent or greater energy savings) for commercial buildings and the 2009 IECC (or code that achieves equivalent or greater energy savings) for residential buildings. Training and assistance needed to develop and implement a plan to achieve compliance with upgraded codes by 2017.

(3) Processes, information, materials and tools necessary to upgrade building

codes to meet Standard 90.1–2007, Energy Standard for Buildings Except Low-Rise Residential Buildings (or equivalent) for commercial buildings and the 2009 International Energy Conservation Code (or equivalent) for residential buildings. Information, materials, and tools necessary to develop and implement a plan to achieve 90-percent compliance with upgraded codes by 2017.

(4) Assistance and resources available from stakeholders, states, local jurisdictions, and others.

Issued in Washington, DC, on April 9, 2010.
