Animal and Plant Health Inspection Service

Title: Importation of Products of Poultry and Birds.

OMB Control Number: 0579-0141.

Summary of Collection: The Animal Health Protection Act (AHPA) of 2002 is the primary Federal law governing the protection of the health of animals under the Animal and Plant Health Inspection Service (APHIS) regulatory authority. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The AHPA is contained in Title X, Subtitle E, and Sections 10401-18 of Public Law 107-171, dated May 13, 2002, and the Farm Security and Rural Investment Act of 2002. The regulations under which disease prevention activities are contained are in Title 9, Chapter 1, Subchapter D, and Parts 91 through 99 of the Code of Federal Regulations. The purpose of these regulations is to allow poultry meat that originates in the United States to be shipped, for processing purposes, to a region where exotic Newcastle disease exists, and then returned to the United States. The process entails the use of five information collection activities in the form of a certificate of origin that must be issued, including serial numbers that must be recorded, records that must be maintained, and cooperative service

Need and Use of the Information: APHIS will collect information to ensure that imported poultry carcasses pose a negligible risk of introducing END into the United States.

Title: Weather Radio Transmitter Grant Program.

OMB Control Number: 0572-0124.

Type of Request: Extension of a currently approved information collection.

Abstract: The National Weather Service operates an All Hazards Early Warning System that alerts people in areas covered by its transmissions of approaching dangerous weather and other emergencies. The National Weather Service can typically provide warnings of specific weather dangers up to fifteen minutes prior to the event. At present, this system covers all major metropolitan areas and many smaller cities and towns; however, many rural areas lack NOAA Weather Radio coverage. The Rural Utilities Service's Weather Radio Transmitter Grant Program finances the installation of new transmitters to extend the coverage of the National Oceanic and Atmospheric Administration's Weather Radio system (NOAA Weather Radio) in rural America thereby promoting public safety and awareness. The President of the United States and the United States Congress have made \$5 million in grant funds available to facilitate the expansion of NOAA Weather Radio system coverage into rural areas that are not covered or are poorly covered at this time. This grant program will continue to provide grant funds, on an expedited basis, for use in rural areas and communities of 50,000 or less inhabitants. Grant funds are available immediately and applications will be processed on a first-come, first-served basis until the appropriation is used in its entirety. Grant funds are used to purchase and install NOAA Weather Radio transmitters and antennas that are combined with donated tower space and other site resources to establish new rural NOAA Weather Radio transmitters. Eligible applicants must be
