

institution to pay claims. Under the statutory order of priority, administrative expenses and deposit liabilities must be paid in full before any distribution may be made to general unsecured creditors or any lower priority claims.

As of December 31, 2010, the value of assets available for distribution by the Receiver, together with all expected recovery sources, was \$14,671,702. As of the same date, administrative expenses and depositor liabilities equaled \$41,374,312, exceeding available assets by at least \$26,702,610. Accordingly, the FDIC has determined that insufficient assets exist to make any distribution on general unsecured creditor claims (and any lower priority claims) and therefore all such claims, asserted or unasserted, will recover nothing and have no value.

Executive Secretary.

Proposed Project

Community-based Organization (CBO) Monitoring and Evaluation Project (CMEP) of Women Involved in Life Learning from Other Women (WILLOW)—New—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP)

Background and Brief Description

CDC began formally partnering with CBOs in the late 1980s to expand the reach of HIV prevention efforts. CBOs were, and continue to be, recognized as important partners in HIV prevention because of their history and credibility with target populations and their access to groups that may not be easily reached. Over time, CDC's program for HIV prevention by CBOs has grown in size, scope, and complexity to respond to changes in the epidemic, including the diffusion and implementation of Effective Behavioral Interventions (EBIs) for HIV prevention. Women Involved in Life Learning from Other Women (WILLOW) is an EBI that focuses on health education and social skills building among women living with HIV.

CDC's EBIs have been shown to be effective under controlled research

environments, but there is limited data on intervention implementation and client outcomes in real-world settings (as implemented by CDC-funded CBOs). The purpose of CMEP is to improve the performance of CDC-funded CBOs delivering particular individual- or group-level behavioral interventions. This is done by monitoring changes in clients' self-reported HIV transmission risk behaviors after participating in the intervention. CMEP also assesses the fidelity of the implementation of the selected intervention at the CBO. The project also plans to conduct process monitoring of the delivery of the intervention in terms of recruitment, retention, and data collection, entry, and management. Four CBOs will receive supplemental funding under PS 10-1003 over a five-year period to participate in CMEP-WILLOW.

From July 1, 2011 to June 30, 2015, CBOs will conduct outcome and process monitoring for this project. Each agency will recruit 400 women living with HIV who are 18 years of age and older, have known their positive HIV status for at least 6 months, and are enrolled in the WILLOW intervention to participate in CMEP-WILLOW. Each participant will complete a 20 minute, self administered, computer based interview prior to their participation in the WILLOW intervention and an 18 minute, self administered, computer based interview at two follow-up time points (90- and 180-days following the WILLOW intervention) to assess their HIV-related attitudes and behavioral risks. CBOs will be expected to retain 80% of these participants at both follow-up interviews.

Throughout the project, funded CBOs will be responsible for managing the daily procedures of CMEP-WILLOW to ensure that all required activities are performed, all deadlines are met, and quality assurance plans, policies and procedures are upheld. CBOs will be responsible for participating in all CDC-sponsored grantee meetings related to CMEP-WILLOW. The total estimated annual burden hours are 338.

ESTIMATED ANNUALIZED BURDEN HOURS

Respondent	Form	Number of respondents	Number of responses per respondent	Average burden response (in hours)
General population	Screener	400	1	2/60
