1. Abstract

The Survey of Graduate Students and Postdoctorates in Science and Engineering (GSS) is sponsored by the National Science Foundation and the National Institutes of Health. The GSS originated in 1966 and has been conducted annually since 1972. The GSS is a census of all departments in science, engineering and health fields within academic institutions with post-baccalaureate programs in the United States. The total number of respondents surveyed in 2009, the last year for which complete response rate data are available, was 13,187 departments (reporting units) located in 703 schools at 575 degree-granting institutions. The GSS is the only national survey that collects information on the characteristics of graduate enrollment for specific science, engineering and health disciplines at the department level. It collects information on race/ethnicity, citizenship, gender, sources of support, mechanisms of support, and enrollment status for graduate students; information on postdoctorates by citizenship, gender, sources of support, doctorate type and origins. It also collects information on other doctorate-holding non-faculty researchers.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “ * * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government.” The GSS is designed to comply with these mandates by providing information on the characteristics of academic graduate

enrollment and postdoctoral components in science, engineering and health fields.

The GSS (along with other academic sector surveys from both NSF and the National Center of Education Statistics) is one of the inputs into the WebCASPAR data system. Among other uses, this NSF on-line database is used by NSF to review changing enrollment levels to assess the effects of NSF initiatives, to track student support patterns and to analyze participation in S&E fields by targeted groups for all disciplines or for selected disciplines and for selected groups of institutions.

The Foundation also uses the GSS information to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. A public use file is also made available on the world-wide Web.

Data are obtained primarily by Web survey (with paper worksheets made available upon request) and starts each fall in mid-October. The data are solicited under the authority of the National Science Foundation Act of 1950, as amended. All information will be used for statistical purposes only. Participation in the survey is voluntary.

2. Expected Respondents

The GSS is census of all eligible academic institutions in the U.S. with post-baccalaureate programs in science, engineering and health fields and their related departments. The response rate is calculated on the number of departments that respond to the survey.

3. Estimate of Burden

The initial GSS data request is sent to the designated respondent (School Coordinator) at each academic institution in the fall. The School Coordinator may complete or delegate all or part of the Part I listing of eligible units (departments, programs, research centers and health care facilities) and Part II data. In all cases, the School Coordinator is responsible for the Part I data collection. Usually, the School Coordinator delegates the Part II collection to unit respondents. The amount of time it takes to provide the information on Part I and Part II varies dramatically and depends to a large degree on the extent to which the school's records are centrally stored and computerized.

The 2010 GSS asked the unit respondents to provide an estimate of the time spent in filling out the GSS. The average burden for completing the GSS was 2.78 hours per reporting unit. In keeping with prior experience, we

estimate that the per unit burden will decrease slightly each year as the respondents become familiar with the question items in the survey, thus estimate a burden of 2.7 hours per reporting unit in 2011. We anticipate that the number of units in 2011 cycle will include the units in 2010, plus approximately 3% increase in units. In addition, an estimated 500 new units will be added to the survey frame as a result of expansion study in 2011. The estimated burden for each cycle of GSS is about 40,000 hours assuming the same response rates as 2009 (99.3% for the schools and the units). The total estimated respondent burden of the GSS would be 120,000 hours over the 3-year clearance period.

Dated: May 5, 2011.

Suzanne H. Plimpton,
Reports Clearance Officer, National Science Foundation.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-64393; File No. SR-EDGA-2011-14]

Self-Regulatory Organizations; EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Amendments to the EDGA Exchange, Inc. Fee Schedule

May 4, 2011.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 29, 2011, the EDGA Exchange, Inc. (the "Exchange" or the "EDGA") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its fees and rebates applicable to Members³ of the Exchange pursuant to EDGA Rule

15.1(a) and (c). All of the changes described herein are applicable to EDGA Members. The text of the proposed rule change is available on the Exchange's Internet Web site at <http://www.directedge.com>.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to offer a reduced rate from \$0.0023 per share to \$0.0022 per share for Flag D executions (as noted in proposed footnote 14 of the fee schedule) provided that the Member routes an average daily volume ("ADV") of more than 30,000,000 shares per day to NYSE using the RDOT or RDOX routing strategies, as defined in Rules 11.9(b)(3)(h) and (i).

The H flag represents non-displayed executions. The Exchange proposes to append the reference to footnote 2 on Flag H so that a reduced rate (of \$0.0010 per share) would be offered provided that the Member adds greater than 1,000,000 shares hidden on a daily basis (yielding Flag H), measured monthly or posts greater than 8,000,000 shares on a daily basis, measured monthly (yielding Flags B,V, Y, 3 or 4). Members not meeting either minimum will be charged \$0.0030 per share.

For customer internalization (*i.e.*, same MPID),⁴ currently there is no charge nor rebate. This was because when the Exchange launched in July 2010 the rebate for removing liquidity (\$0.0002 per share) was offset by the fee for adding liquidity (\$0.0002 per share). This situation yields Flag "E" on both sides of an execution. During the Pre-Opening and Post-Closing sessions,

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ A Member is any registered broker or dealer, or any person associated with a registered broker or dealer, that has been admitted to membership in the Exchange.

⁴ This occurs when two orders presented to the Exchange from the same Member (*i.e.*, MPID) are presented separately and not in a paired manner, but nonetheless inadvertently match with one another. Members are advised to consult Rule 12.2 respecting fictitious trading.
