

Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: May 23, 2011.

Darrin A. King,

Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management.

Office of Planning, Evaluation and Policy Development

Type of Review: New.

Title of Collection: Evaluation of the Effectiveness of Online Learning Courses for Secondary Students.

OMB Control Number: 1875-NEW.

Agency Form Number(s): N/A.

Frequency of Responses: Once.

Affected Public: Individuals or households.

Total Estimated Number of Annual Responses: 1,761.

Total Estimated Number of Annual Burden Hours: 220.

Abstract: Given the considerable scale at which online learning is being used in schools today, it is particularly important that policymakers have research-based guidance available about how best to deploy online learning activities. However, few rigorous studies have been completed that compare K–12 student achievement in online learning to traditional, classroom-based education. Similarly, while many articles provide advice regarding the “best” ways to implement online learning, few report an empirical basis for recommended practices. To fill this critical gap in knowledge, this study will provide rigorous empirical data on the effectiveness of online learning for secondary students. This study will conduct surveys of teachers and students engaged in online learning courses in two states: Florida and North Carolina. Both states have large-scale, statewide virtual school providers. In Florida, the impact of a game-based, online U.S. History course offered by the Florida Virtual School (FLVS) on student learning will be compared to a traditional FLVS U.S. History online course using an experimental design, randomly assigning students to conditions. Learning outcomes will be assessed at the end of two topical units—Civil Rights and the Industrial Revolution. In North Carolina, the impact of online learning for secondary students enrolled in five different

courses offered by the North Carolina Virtual Public School will be compared with peers enrolled in similar courses in face-to-face instruction. The North Carolina study will use a quasi-experimental design using propensity score matching. State end-of-course exams for each course and the scores on the Advanced Placement U.S. History exam will be used as the primary outcome measures. In addition to the surveys of online teachers and students, a sample of North Carolina teachers teaching similar courses in face-to-face instruction will be administered a survey to collect information on instructional practices in the comparison face-to-face courses.

Copies of the proposed information collection request may be accessed from <http://edicsweb.ed.gov>, by selecting the “Browse Pending Collections” link and by clicking on link number 4629. When you access the information collection, click on “Download Attachments” to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202–4537. Requests may also be electronically mailed to ICDocketMgr@ed.gov or faxed to 202–401–0920. Please specify the complete title of the information collection and OMB Control Number when making your request.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC11–516A–000]

Commission Information Collection Activities (FERC–516A), Proposed Collection; Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice.

SUMMARY: In compliance with the requirements of section 3506(c)(2)(a) of the Paperwork Reduction Act of 1995 (Pub. L. 104–13), the Federal Energy Regulatory Commission (Commission) is soliciting public comment on the specific aspects of the information collection described below.

DATES: Comments in consideration of the collection of information are due July 26, 2011.

ADDRESSES: Commenters must send an original of their comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street, NE., Washington, DC 20426. Comments may be filed either on paper or on CD/DVD, and should refer to Docket No. IC11–516A–000. Documents must be prepared in an acceptable filing format and in compliance with Commission submission guidelines at <http://www.ferc.gov/help/submission-guide.asp>. eFiling and eSubscription are not available for Docket No. IC11–516A–000, due to a system issue.

All comments and FERC issuances may be viewed, printed or downloaded remotely through FERC’s eLibrary at <http://www.ferc.gov/docs-filing/elibrary.asp>, by searching on Docket No. IC11–516A. For user assistance, contact FERC Online Support by e-mail at ferconlinesupport@ferc.gov, or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

FOR FURTHER INFORMATION CONTACT:

Ellen Brown may be reached by e-mail at DataClearance@FERC.gov, telephone at (202) 502–8663, and fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC–516A, “Small Generator Interconnection Agreements” (OMB No. 1902–2003), is used by the Commission to enforce the statutory provisions of sections 205 and 206 of the Federal Power Act (FPA), as amended by Title II, section 211 of the Public Utility Regulatory Policies Act of 1978 (PURPA)(16 U.S.C. 825d). FPA sections 205 and 206 require the Commission to remedy undue discriminatory practices within interstate electric utility operations.

The Commission amended its regulations in 2005 with Order No. 2006 to require public utilities that own, control, or operate facilities used for the transmission of electric energy in interstate commerce to amend their Open Access Transmission Tariffs (OATTs) to include a Commission-approved *pro forma* interconnection procedures document and a standard interconnection agreement for the interconnection of generating facilities having a capacity of no more than 20 MW (Small Generators).¹

Prior to Order No. 2006, the Commission’s policy had been to

¹ *Standardization of Small Generator Interconnection Agreements and Procedures*, Order No. 2006, 70 FR 34189 (May 12, 2005), FERC Stats. & Regs. ¶ 31,180 (2005).

address interconnection issues on a case-by-case basis. Although a number of transmission providers had filed interconnection procedures as part of their OATTs, many industry participants remained dissatisfied with existing interconnection policies and procedures. With an increasing number of interconnection-related disputes, it became apparent that the case-by-case approach was an inadequate and inefficient means to address interconnection issues. This prompted the Commission to adopt, in Order No. 2006, a single set of procedures for

jurisdictional transmission providers and a single uniformly applicable interconnection agreement for transmission providers to use in interconnecting with Small Generators.

With the incorporation of these documents in their OATTs, there is no longer a need for transmitting utilities to file case-by-case interconnection agreements and procedures with the Commission. However, on occasion, circumstances warrant non-conforming agreements or a situation-specific set of procedures. These non-conforming documents must be filed in their

entirety with the Commission for review and action.

The information collected is in response to a mandatory requirement. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR part 35, 35.28(f).

Action: The Commission is requesting a three-year extension of the current expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

Number of respondents annually (1)	Number of responses per respondent (2)	Average burden hours per response (3)	Total annual burden hours (1) × (2) × (3)
238 (maintenance of documents)	1	1	238
40 (filing of conforming agreements)	1	25	1,000
Totals			1,238

The estimated burden of the continued requirement to maintain the procedures and agreement documents in transmission providers' OATTs is reflected herein as is the filing of non-conforming interconnection procedures and agreements that occur on occasion. The estimated total cost to respondents is \$84,739 (rounded). [1,238 hours divided by 2,080 hours² per year, times \$142,372³ equals \$84,739]. The average cost per respondent is \$305 (rounded).

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for

information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities, which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology *e.g.* permitting electronic submission of responses.

Dated: May 20, 2011.

Kimberly D. Bose,

Secretary.
