

documentation of the materials included in the transfer. In some instances, skeletal elements of the same individual were separated and sent to multiple locations. Between 1957 and sometime prior to 1966, the Burke Museum transferred the remains of two individuals from Pit 5 (identified as 5A and 5B) to the Western Washington University, Bellingham, WA. These individuals stayed at Western Washington University until October 2009, when they were transferred to Central Washington University as part of the NAGPRA inventory effort. In February 1974, the Burke Museum transferred four individuals, recovered from Pits 4, 5, and 6 (identified as 4, 5A, 5B, and 6), to Central Washington University. These four individuals have remained at Central Washington University. In March 1974, the Burke Museum transferred all remaining skeletal elements (4, 5A, 5B, and 6) to Seattle University, Seattle, WA. In January 1990, Seattle University transferred two skeletal elements from individual 5A to the Confederated Tribes of the Colville Reservation, Washington, where they were placed in the Colville Tribal Repository, in Nespelem, WA. In March 2006, the Confederated Tribes of the Colville Reservation, Washington, transferred temporary custody of this individual to Central Washington University in order to supplement the inventory of that individual's remains. Upon completion of the inventory, the two elements from individual 5A were returned to the Confederated Tribes of the Colville Reservation (they are presently at the Colville Tribal Repository). In December 1991, Seattle University transferred the other elements of individual 5A, as well as the skeletal elements they held from individuals 4, 5B, and 6, to an organization called Daybreak Star Indian Cultural Center. In June 1993, on behalf of Seattle University, the Daybreak Star Indian Cultural Center transferred the human remains in their possession back to the Burke Museum. In October 2006, the Burke Museum transferred all remains in their possession (*i.e.*, the remains returned to them by Daybreak Star Indian Cultural Center) to Central Washington University in order to facilitate the Bureau of Reclamation's NAGPRA inventory effort. With the exception of the two elements from individual 5A that are at the Colville Tribal Repository, all known skeletal elements from the individuals recovered from 45OK7, as well as all the associated funerary objects recovered in 1950, are now at Central Washington University.

No physical description of the human remains was prepared at the time of recovery. Between 1950 and 1957, Roger Heglar, a University of Washington graduate student, analyzed the burials from 45OK7. That inventory documented the partial remains of four individuals in collections; the field records indicated the excavators, in 1950, had believed the remains of three individuals were recovered. A 1966 inventory by the Burke Museum also identified four individuals. However, the current physical inventory completed by Central Washington University determined that the collection of skeletal elements previously identified as individual 5A actually included skeletal elements of two individuals. In conclusion, elements from five individuals (4, 5A, 5B individual 1, 5B individual 2, and 6) recovered from site 45OK7 are presently in collections.

Osteological evidence documented by the physical anthropologist, the archeological association of the materials with a prehistoric site, and the kinds of associated funerary objects recovered, indicate that the human remains described above are Native American. The geographic location of the site within the Plateau Culture Area, tribal oral tradition, and anthropological and historical research all indicate that site 45OK7 lies within an area occupied by the San Poil and Nespelem tribes or bands, who are members of and legally represented by the Confederated Tribes of the Colville Reservation, Washington. Moreover, site 45OK7 is situated within the exterior boundaries of the Colville Indian Reservation, WA.
