

Comments Invited: Interested persons are invited to submit such written data, views, or arguments, as they may desire. Communications should identify the consensus standard number and be submitted to the address specified above. All communications received on or before the closing date for comments will be forwarded to ASTM International Committee F37 for consideration. The standard may be changed in light of the comments received. The FAA will address all comments received during the recurring review of the consensus standard and will participate in the consensus standard revision process.

Background: Under the provisions of the Sport Pilot and Light-Sport Aircraft rule, 69 FR 44772 (July 27, 2004), and revised Office of Management and Budget (OMB) Circular A-119, "Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities," dated February 10, 1998, industry and the FAA have been working with ASTM International to develop consensus standards for light-sport aircraft. These consensus standards satisfy the FAA's goal for airworthiness certification and a verifiable minimum safety level for light-sport aircraft. Instead of developing airworthiness standards through the rulemaking process, the FAA participates as a member of Committee F37 in developing these standards. The use of the consensus standard process assures government and industry discussion and agreement on appropriate standards for the required level of safety.

Comments on Previous Notices of Availability

In the Notice of Availability (NOA) issued on November 11, 2010, and published in the **Federal Register** on November 18, 2011 the FAA asked for public comments on the new and revised consensus standards accepted by that NOA. The comment period closed on January 18, 2011. No public comments were received regarding the standards accepted by this NOA.

Consensus Standards in This Notice of Availability

The FAA has reviewed the standards presented in this NOA for compliance with the regulatory requirements of the rule. Any light-sport aircraft issued a special light-sport airworthiness certificate, which has been designed, manufactured, operated and maintained, in accordance with this and previously accepted ASTM consensus standards provides the public with the

appropriate level of safety established under the regulations. Manufacturers who choose to produce these aircraft and certificate these aircraft under 14 CFR part 21, §§ 21.190 or 21.191 are subject to the applicable consensus standard requirements. The FAA maintains a listing of all accepted standards on the FAA Web site.

The Revised Consensus Standard and Effective Period of Use

The following previously accepted consensus standards have been revised, and this NOA is accepting the later revision. Either the previous revision or the later revision may be used for the initial certification of special light-sport aircraft until November 12, 2011. This overlapping period of time will allow aircraft that have started the initial certification process using the previous revision level to complete that process. After November 12, 2011, manufacturers must use the later revision and must identify the later revision in the Statement of Compliance for initial certification of special light-sport aircraft unless the FAA publishes a specific notification otherwise. The following Consensus Standards may not be used after November 12, 2011:

ASTM Designation F2245-09, titled: Standard Specification for Design and Performance of a Light Sport Airplane
ASTM Designation F2506-07, titled: Standard Specification for Design and Testing of Fixed-Pitch or Ground Adjustable Light Sport Aircraft Propellers.

The Consensus Standards

The FAA finds the following new and revised consensus standards acceptable for certification of the specified aircraft under the provisions of the Sport Pilot and Light-Sport Aircraft rule. The following consensus standards become effective May 12, 2011 and may be used unless the FAA publishes a specific notification otherwise:

ASTM Designation F2245-10c, titled: Standard Specification for Design and Performance of a Light Sport Airplane
ASTM Designation F2506-10, titled: Standard Specification for Design and Testing of Fixed-Pitch or Ground Adjustable Light Sport Aircraft Propellers

ASTM Designation F2746-09, titled: Standard Specification for Pilot's Operating Handbook (POH) for Light Sport Airplane.

Federal Highway Administration

Notice of Final Federal Agency Actions on I-5: Fern Valley Interchange Project: Jackson County, OR

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of limitations on claims for judicial review of actions by FHWA.

SUMMARY: This notice announces actions taken by the FHWA, National Marine Fisheries Service (NMFS) and other Federal agencies that are final within the meaning of 23 U.S.C. 139(l)(1). The actions relate to a proposed highway project, I-5: Fern Valley Interchange in Jackson County, Oregon. This action grants approval for the project.

DATES: By this notice, the FHWA is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal agency actions on the highway project will be barred unless the claim is filed on or before January 25, 2012. If the Federal law that authorizes judicial review of a claim provides a time period of less than 180 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Michelle Eraut, Environmental Program Manager, Federal Highway Administration, 530 Center Street, NE., Suite 420, Salem, Oregon 97301, Telephone: (503) 316-2559. The I-5: Fern Valley Interchange Environmental Assessment (EA) and other project records are available upon written request from the Federal Highway Administration at the address shown above. Comments or questions concerning this proposed action and the I-5: Fern Valley Interchange should be directed to the FHWA at the address provided above.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the FHWA has taken final agency action subject to 23 U.S.C. 139(l)(1) by issuing approval for the following highway project in the State of Oregon: I-5: Fern Valley Interchange. The project will replace the existing interchange at Fern Valley with a crossing-diamond type interchange to improve safety and increase capacity. To the west of I-5, the existing bridge over Bear Creek will be replaced by a longer wider structure and continuing west, Fern Valley Road will be widened two lanes and the OR99/Fern Valley intersection will be improved. East of the interchange, North Phoenix Road will be realigned and South Phoenix Road will be extended to meet at a new

intersection to the north where Grove Way, Extended South Phoenix Road and North Phoenix Road meet. The actions by the Federal agencies and the laws under which such actions were taken are described in the October 18, 2010, Environmental Assessment for the project and in the FHWA Finding of No Significant Impact (FONSI) issued on June 30, 2011 and in other documents in the FHWA project records. The EA, FONSI and other project records are available by contacting the FHWA at the address provided above. The FHWA EA and FONSI can be viewed and downloaded from the project Web site at http://www.oregon.gov/ODOT/HWY/REGION3/fvi_index.shtml.
