The Proposal

The FAA is considering an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to establish

Class E airspace at Palmyra, PA, providing the controlled airspace required to support the new RNAV GPS standard instrument approach procedures for Reigle Field. Controlled airspace extending upward from 700 feet above the surface would be established for the safety and management of IFR operations at the airport.

Class E airspace designations are published in Paragraph 6005 of FAA Order 7400.9U, dated August 18, 2010, and effective September 15, 2010, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This proposed rulemaking is promulgated under the authority described in subtitle VII, part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This proposed regulation is within the scope of that authority as it would establish Class E airspace at Reigle Field, Palmyra, PA.

Approval and Promulgation of Air Quality Implementation Plans; Minnesota; Rules Update

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to take several actions on a revision to the Minnesota State Implementation Plan (SIP) which updates Minnesota's rules in the SIP. The Minnesota Pollution Control Agency (MPCA) submitted the SIP revision to EPA on May 5, 2008. EPA is proposing to approve the majority of MPCA's submittal, which will result in consistent enforceability of rules at the state and Federal levels. EPA is proposing to defer action on two sections of Minnesota's rules related to the state's operating permit program. Finally, EPA is proposing to disapprove the state's request to remove the

Minneapolis/St. Paul vehicle inspection and maintenance program from the Minnesota SIP. These actions are approvable because they are consistent with the Clean Air Act (CAA) and EPA regulations.

DATES: Comments must be received on or before September 9, 2011.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this **Federal Register**, EPA is approving the state's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period.

Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. Approval, Disapproval and Promulgation of Air Quality Implementation Plans; Colorado; Smoke, Opacity and Sulfur Dioxide Rule Revisions; Regulation 1

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed Rule.

SUMMARY: EPA is proposing to partially approve and partially disapprove revisions to Colorado's Regulation 1 adopted by the State of Colorado on July 21, 2005 and submitted to EPA on August 8, 2006. The revisions involve the use of obscurants during military exercises while maintaining air quality, averaged emission rate determination over time and recordkeeping requirements. Colorado's Regulation 1 governs opacity, particulate, sulfur dioxide (SO₂), and carbon monoxide (CO) emissions from sources. EPA has determined that most of the revisions in Colorado's submittal are consistent with the Clean Air Act (CAA) and should be approved, but a revision to a provision governing fuel burning equipment is not and should be disapproved.
