Proposed Project

CDC Diabetes Prevention Recognition Program (DPRP)—New—Division of Diabetes Translation, National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) is establishing the CDC Diabetes Prevention Recognition Program (DPRP) as authorized by Section 399-V of Public Law 111-148, the Patient Protection and Affordable Care Act. The DPRP will provide a mechanism for recognizing organizations that deliver effective, community-based type 2 diabetes prevention programs according to written program standards.

CDC will collect information to monitor, evaluate, and provide technical

assistance to organizations that apply for recognition through the DPRP. Applicant organizations may be public- or private-sector entities. Information collection will include a one-time, on-line application form to verify the organization's eligibility. Thereafter, each applicant organization will submit de-identified program evaluation (process and outcome) data to CDC every six months. Information will be collected electronically. CDC will use the information to monitor program fidelity to a CDC-approved diabetes prevention curriculum, to evaluate its effectiveness and to provide targeted technical assistance to applicant organizations. Contact information for organizations that fully meet DPRP standards will be made available on the DPRP Web site.

OMB approval is requested for three years. CDC anticipates seeking continued OMB approval throughout the lifetime of the DPRP. Participation in the DPRP is voluntary, and there are no costs to organizations other than their time. The total estimated annualized burden hours are 600.

The next cycle of selection of candidates will begin in the Winter of 2011, for selection of potential nominees to replace members whose terms will end on March 31, 2012 and March 31, 2013 respectively. Selection of members is based on candidates' qualifications to contribute to the accomplishment of BCCEDCAC objectives (<http://www.cdc.gov/maso/FACM/facmBCCEDCAC.htm>). The U.S. Department of Health and Human Services policy stipulates that committee membership shall be balanced in terms of professional training and background, points of view represented, and the committee's function. Consideration is given to a broad representation of geographic areas within the U.S., with diverse representation of both genders, ethnic and racial minorities, and persons with disabilities. Nominees must be U.S. citizens, and cannot be full-time employees of the U.S. Government.

Candidates should submit the following items:

This form allows CDC to determine whether there is a statutory conflict between that person's public responsibilities as a Special Government Employee and private interests and activities, or the appearance of a lack of impartiality, as defined by Federal regulation. The form may be viewed and downloaded at http://www.usoge.gov/forms/oge450_pdf/oge450_accessible.pdf.

This form should not be submitted as part of a nomination.
