The NRC is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), entitled, "Applications of Bioassay for Radioiodine," is temporarily identified by its task number, DG-8050, which should be mentioned in all related correspondence. DG-8050 is proposed Revision 2 of Regulatory Guide 8.20, dated September 1979.

This regulatory guide provides criteria and methods acceptable to the staff of
