C. What should I consider as I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data that you used to support your views.
4. Provide specific examples to illustrate your concerns and suggest alternatives.
5. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

D. How may I participate in this meeting?

You may participate in this meeting by following the instructions in this section. To ensure proper receipt by EPA, it is imperative that you identify docket ID number EPA-HQ-ORD-2011-0693 in the subject line on the first page of your request.

1. *Oral comments.* Requests to present oral comments will be accepted up to Wednesday, October 12, 2011. To the extent that time permits, interested persons who have not pre-registered may be permitted by the Chair of the HSRB to present oral comments at the meeting. Each individual or group wishing to make brief oral comments to the HSRB is strongly advised to submit their request (preferably via e-mail) to Jim Downing or Lu-Ann Kleibacker, under **FOR FURTHER INFORMATION CONTACT**, no later than noon, Eastern Time, Wednesday, October 12, 2011, in order to be included on the meeting agenda and to provide sufficient time for the HSRB Chair and HSRB Designated Federal Official (DFO) to review the meeting agenda to provide an appropriate public comment period. The request should identify the name of the individual making the presentation and the organization (if any) the individual will represent. Oral comments before the HSRB are generally limited to five minutes per individual or organization. Please note that this includes all individuals appearing either as part of, or on behalf of, an organization. While it is our intent to hear a full range of oral comments on the science and ethics issues under discussion, it is not our intent to permit organizations to expand the time limitations by having numerous individuals sign up separately to speak on their behalf. If additional time is available, further public comments may be possible.

2. *Written comments.* Submit your written comments prior to the meeting. For the HSRB to have the best opportunity to review and consider your comments as it deliberates on its report, you should submit your comments at least five business days prior to the beginning of this meeting. If you submit comments after this date, those comments will be provided to the Board members, but you should recognize that the Board members may not have adequate time to consider those comments prior to making a decision. Thus, if you plan to submit written comments, the Agency strongly encourages you to submit such comments no later than noon, Eastern Time, Wednesday, October 12, 2011.

You should submit your comments using the instructions in Section I., under subsection C., "What should I consider as I prepare my comments for EPA?" In addition, the Agency also requests that persons submitting comments directly to the docket also provide a copy of their comments to Jim Downing or Lu-Ann Kleibacker listed under **FOR FURTHER INFORMATION CONTACT**. There is no limit on the length of written comments for consideration by the HSRB.

E. Background

The HSRB is a Federal advisory committee operating in accordance with the Federal Advisory Committee Act (FACA) 5 U.S.C. App.2 9. The HSRB provides advice, information, and recommendations to EPA on issues related to scientific and ethical aspects of human subjects research. The major objectives of the HSRB are to provide advice and recommendations on: (1) Research proposals and protocols; (2) reports of completed research with human subjects; and (3) how to strengthen EPA's programs for protection of human subjects of research. The HSRB reports to the EPA Administrator through EPA's Science Advisor.

1. *Topics for discussion.* At its meeting on October 19 and 20, 2011, EPA's Human Studies Review Board will consider scientific and ethical issues surrounding these topics:

a. A new scenario design and associated protocol from the Antimicrobials Exposure Assessment Task Force II (AEATF-II), describing proposed research to monitor the dermal and inhalation of workers while pouring liquid antimicrobial pesticide products from both conventional and reduced-splash containers. EPA requests the advice of the HSRB concerning whether, if it is revised as suggested in EPA's review and if it is performed as described, this research is likely to generate scientifically reliable data, useful for assessing the exposure of those who pour liquid antimicrobial pesticide products from conventional and reduced-splash containers, and to meet the applicable requirements of 40 CFR part 26, subparts K and L.

b. A new scenario design and associated protocol from the Agricultural Handler Exposure Task Force (AHETF) describing proposed research to measure dermal and inhalation exposure to workers who load liquid pesticides with closed system equipment. EPA requests the advice of the HSRB concerning whether, if it is revised as suggested in EPA's review and if it is performed as

described, this research is likely to generate scientifically reliable data, useful for assessing the exposure of those who load liquid pesticides with closed system equipment, and to meet the applicable requirements of 40 CFR part 26, subparts K and L.

c. The unpublished report of the completed Carroll-Loye Biological Research, Inc. study No. Mas-003 to evaluate in the field the repellent efficacy against mosquitoes of a product containing 16% para-methane-3,8-diol and 2% lemongrass oil. The protocol for this study was reviewed favorably by the HSRB at their meeting in October 2010. EPA seeks the advice of the HSRB on the scientific soundness of this completed study for use to estimate the duration of complete protection against mosquitoes provided by the tested repellent, and on whether available information supports a determination that the study was conducted in substantial compliance with subparts K and L of 40 CFR part 26.

d. A published report by *Moiemen et al.* (2010) of an intentional exposure human study measuring dermal absorption of silver from the use of nanosilver-containing wound dressings to treat major burns. EPA seeks the advice of the HSRB on the scientific soundness of this completed study for use in support of an assessment of the absorption of nanosilver particles through the skin, and on whether there is adequate information to determine that the study was conducted in substantial compliance with procedures at least as protective as those in subparts A–L of EPA's regulation at 40 CFR part 26.

2. *Meeting minutes and reports.* Minutes of the meeting, summarizing the matters discussed and recommendations, if any, made by the advisory committee regarding such matters, will be released within 90 calendar days of the meeting. Such minutes will be available at <http://www.epa.gov/osa/hsrb/> and <http://www.regulations.gov>. In addition, information regarding the Board's Final meeting report, will be found at <http://www.epa.gov/osa/hsrb/> or from the person listed under **FOR FURTHER INFORMATION CONTACT**.
