ACTION: Notice of availability.

SUMMARY: NMFS has received an application for an incidental take permit (Permit) from the North Carolina Division of Marine Fisheries (NCDMF) pursuant to the Endangered Species Act of 1973, as amended (ESA). As required by the ESA, NCDMF's application includes a conservation plan designed to minimize and mitigate take of endangered or threatened species. The permit application is for the incidental take of ESA-listed adult and juvenile sea turtles associated with otherwise lawful commercial gill net fisheries operating in inshore waters of North Carolina. The duration of the proposed permit is for 3 years. NMFS is providing this notice to allow other agencies and the public an opportunity to review and comment on the application and associated conservation plan. All comments received will become part of the public record and will be available for review.

SUPPLEMENTARY INFORMATION: Section 9 of the ESA and Federal regulations prohibit the "taking" of a species listed as endangered or threatened. The term "take" is defined under the ESA to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may issue permits, under limited circumstances, to take listed species incidental to, and not the purpose of, otherwise lawful activities. Section 10(a)(1)(B) of the ESA provides for authorizing incidental take of listed

species. NMFS regulations governing permits for threatened and endangered species are published at 50 CFR 222.307.

Species Covered in This Notice

The following species are included in the conservation plan and Permit application: Loggerhead (*Caretta caretta*), green (*Chelonia mydas*), leatherback (*Dermochelys coriacea*), hawksbill (*Eretmochelys imbricata*), and Kemp's ridley (*Lepidochelys kempii*) sea turtles.

Background

NMFS issued Permit No. 1259 to NCDMF (65 FR 65840, November 2, 2000), Permit No. 1348 (66 FR 51023, October 5, 2001), Permit No. 1398 (67 FR 67150, November 4, 2002), and Permit No. 1528 (70 FR 52984, September 6, 2005) authorizing the incidental take of the foregoing species in certain segments of the commercial fall gill net fisheries for flounder in Pamlico Sound subject to a series of mandatory sea turtle management and monitoring requirements and limits on the numbers of individuals that could be taken annually. On August 18, 2011, NCDMF submitted a revised application to NMFS for Permit No. 16230, authorizing incidental take of ESA-listed sea turtles associated with commercial and recreational gillnet fisheries in inshore state waters for 3 years. This application includes endangered Kemp's ridley, leatherback, and hawksbill sea turtles and threatened green and loggerhead sea turtles. This permit, if issued, and implementing the conservation plan would allow for the incidental take of specified numbers of sea turtles incidental to the continued commercial harvest of target fish species subject to conservation, management and monitoring requirements set forth in the plan and as permit conditions deemed necessary and appropriate by the NMFS.

Conservation Plan

The conservation plan prepared by NCDMF describes measures designed to monitor, minimize, and mitigate the incidental take of ESA-listed sea turtles. The conservation plan includes managing inshore gill net fisheries by dividing estuarine waters into 5 management units (i.e., A-E). Each of the management units would be monitored seasonally and by fishery.

Management Units were delineated on the basis of three primary factors: Similarity of fisheries and management; extent of known protected species interactions in commercial gill net fisheries; and unit size and the ability of
