V. Preliminary Finding

Following a thorough review of the application file and other pertinent information, and for the reasons stated above, OSHA determined that CSL does not meet all of the requirements for renewal of its NRTL recognition. The NRTL Program staff, therefore, recommends preliminarily that the Assistant Secretary deny CSL's application for renewal of its NRTL recognition.

OSHA welcomes public comment as to whether CSL meets the requirements of 29 CFR 1910.7 for renewal of its recognition as an NRTL. Comments should consist of pertinent written documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. OSHA must receive the written request for an extension by the due date for comments (see **DATES** above). OSHA will limit any extension to 30 days unless the requester justifies a longer period. OSHA may deny a request for an extension if the requester does not adequately justify it. To obtain or review copies of the publicly available information in CSL's application and other pertinent documents (including exhibits), and all submitted comments, contact the Docket Office, Room N-2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the address listed above under **ADDRESSES**; these materials also are available online at <http://www.regulations.gov> under Docket No. OSHA-2010-0018.

The NRTL Program staff will review all comments submitted to the docket in a timely manner, and, after addressing the issues raised by the comments, will recommend whether to grant the renewal of NRTL recognition to CSL. The Assistant Secretary will make the final decision on granting NRTL recognition, and, in making this

decision, may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC has accepted for detailed technical review an application for a new license for the possession and use of special nuclear material (SNM) for performance testing of radiation detection systems for locating SNM, under a project sponsored by the Domestic Nuclear Detection Office (DNDO) of the U.S. Department of Homeland Security (DHS). Rapiscan Laboratories, Inc. (the Applicant) requested the new license for a period of 10 years. This license application, if approved, would authorize the Applicant to possess and use special nuclear materials under 10 CFR Part 70, “Domestic Licensing of Special Nuclear Material.”

II. Discussion

In its application, dated October 22, 2010, the Applicant requested a license to possess and use SNM to conduct tests of new technology for use in detection systems. The SNM would be used as test objects for concept demonstrations and characterization testing. Following an administrative review, the NRC requested the Applicant to revise its application to include elements essential to conducting a detailed technical review. The Applicant submitted a revised license application, dated February 9, 2011, and supplemental information on March 10, 2011. By letter dated March 10, 2011, the NRC staff found the revised license application acceptable to begin a detailed technical review. The application has been docketed in Docket No. 70–7021.

If the NRC approves the license application, the basis for approval will be documented in a Safety Evaluation Report (SER) supporting the issuance of a new NRC license. The SER would contain the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the NRC's regulations, for issuing an SNM license. The SER would also include a determination of the need to complete an environmental
