

2.2.3 *Dishwashers that operate with an electrical supply of 208 volts.* Maintain the electrical supply to the dishwasher at 208 volts ± 2 percent and within 1 percent of its nameplate frequency as specified by the manufacturer.

DOE makes decisions on waivers and interim waivers for only those models specifically set out in the petition, not future models that may be manufactured by the petitioner. Miele may submit a new or amended petition for waiver and request for grant of interim waiver, as appropriate, for additional models of dishwashers for which it seeks a waiver from the DOE test procedure. Grant of an interim waiver does not release a petitioner from the certification requirements set forth at 10 CFR part 429.

IV. Summary and Request for Comments

Through today's notice, DOE announces receipt of Miele's petition for waiver from certain parts of the test procedure that apply to dishwashers. DOE is publishing Miele's petition for waiver in its entirety pursuant to 10 CFR part 430.27(b)(1)(iv). The petition contains no confidential information. The petition includes a suggested alternate test procedure which is to include a provision for a 208 volt electrical supply voltage.

DOE solicits comments from interested parties on all aspects of the petition. Pursuant to 10 CFR 430.27(b)(1)(iv), any person submitting written comments to DOE must also send a copy of such comments to the petitioner. The contact information for the petitioner is Mr. Steve Polinski, Senior Manager Regulatory Affairs, Miele Incorporated, 9 Independence Way, Princeton, NJ 08540. All submissions received must include the agency name and case number for this proceeding. Submit electronic comments in WordPerfect, Microsoft Word, Portable Document Format (PDF), or text (American Standard Code for Information Interchange (ASCII)) file format and avoid the use of special characters or any form of encryption. Wherever possible, include the electronic signature of the author. DOE does not accept telefacsimiles (faxes).

Re: Application for Interim Waiver and Petition for Waiver, 10 CFR 430 Subpart B, Appendix C—Uniform Test Method for Measuring Energy Consumption of Dishwashers

Dear Assistant Secretary Zoi,
Miele Inc is submitting this Application for Interim Waiver and Petition for Waiver of the Department of Energy's Test procedure pursuant to 10 CFR 430.27, to the Department of Energy concerning the test procedure found in 10 CFR 430, Subpart B, Appendix C for measuring energy consumption of dishwashers specifically the Miele G7856-208V.

The request for this waiver is focused on the testing voltages specified in the existing test procedure found in Section 2.2.

2.2.1 Dishwashers that operate with an electrical supply of 115 volts. Maintain the electrical supply to the dishwasher at 115 Volts ± 2 percent and within 1 percent of the nameplate frequency as specified by the manufacturer.

2.2.2 Dishwashers that operate with an electrical supply of 240 Volts. Maintain the electrical supply to the dishwasher at 240 volts ± 2 percent and within 1 percent of its nameplate frequency as specified by the manufacturer.

Currently there is no provision to test dishwashers at 208 Volts.

There are many instances where only 208 Volts is provided to the consumer. Dishwashers rated at 240 Volts would not allow the proper operation of a dishwasher when connected to a 208 Volt supply. To achieve the data plate rating, appropriate voltage components are used in the design of the 208 Volt dishwashers.

The proposed test procedure would allow for a variation in electrical supply voltage to 208 Volts based on the electrical safety test data plate rating. In the case of the G7856-208V, a rating of 208 Volts ± 2 percent and within 1 percent of its nameplate frequency as specified by the manufacturer would be used to perform the energy test.

Miele requests immediate relief by grant of the proposed interim waiver, justified by the following reasons:

Economic Hardship. Since the Miele 208V dishwasher is intended to be sold in applications where 240Volts is not made available to the consumer, denial of this Application for Interim Waiver and Petition for Waiver would eliminate

the possibility of high performance dishwasher sales where a compatible voltage is not present.

Public Policy Merits. The public policy benefits of encouraging business success and fostering innovation in high performance dishwasher design are additional reasons for prompt approval of the requested interim waiver.

We hereby certify that all dishwasher manufacturers of domestically-marketed units known to Miele Appliances, Inc. have been notified by letter of this application, copies of which are attached

Thank you for your timely attention to this Application for Interim Waiver and Petition for Waiver.

Best regards,

Steve Polinski
