Notice of Opportunity for Public Comment on the Proposed Model Safety Evaluation for Plant-Specific Adoption of Technical Specifications Task Force Traveler TSTF-505, Revision 1, "Provide Risk-Informed Extended Completion Times—RITSTF Initiative 4B"

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is requesting public comment on the proposed model safety evaluation (SE) for plant-specific adoption of Technical Specifications (TS) Task Force (TSTF) Traveler TSTF–505, Revision 1, "Provide Risk-Informed Extended Completion Times—RITSTF Initiative 4B." TSTF-505, Revision 1, is available in the Agencywide Documents Access and Management System (ADAMS) under Accession Number ML111650552; the model application is available in ADAMS under Accession Number ML112850506. The proposed model SE for plant-specific adoption of TSTF-505, Revision 1, is available electronically under ADAMS Accession Number ML112690239.

The proposed amendment would modify the TS requirements related to Completion Times (CTs) for Required Actions to provide the option to calculate a longer, risk-informed CT. A new program, the Risk-Informed Completion Time (RICT) Program, is added to TS Section 5, Administrative Controls. The proposed change revises the Improved Standard Technical Specification (ISTS), NUREGs-1430, -1431, -1432, -1433, and -1434.

DATES: The comment period expires on December 30, 2011. Comments received after this date will be considered, if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any one of the following methods. Please include Docket ID NRC–2011–0277 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site http://www.regulations.gov. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including

any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.

FOR FURTHER INFORMATION CONTACT: Ms. Michelle C. Honcharik, Senior Project Manager, Licensing Processes Branch, Mail Stop: O–12 D1, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington,

DC, 20555–0001; telephone (301) 415–1774 or email at michelle.honcharik@nrc.gov or Ms. Kristy Bucholtz, Technical Specifications Branch, Mail Stop: O–7 C2A, Division of Safety Systems, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC, 20555–0001; telephone (301) 415–1295 or email; kristy.bucholtz@nrc.gov.

SUPPLEMENTARY INFORMATION: TSTF-505, Revision 1, is applicable to all nuclear powered reactors. TSTF-505 revises the TS to (1) Add a new RICT program to the Administrative Controls of TS, (2) modify selected Required Actions to permit extending the CTs, provided risk is assessed and managed within an acceptable configuration risk management program (CRMP), (3) add new Conditions, Required Actions, and CTs to address conditions not currently addressed in TS, and (4) add a new example in TS Section 1.3, to describe application of the RICT Program. The model SE will facilitate expedited approval of plant-specific adoption of TSTF-505, Revision 1.

This notice provides an opportunity for the public to comment on proposed changes to the ISTS after a preliminary assessment and finding by the NRC staff that the agency will likely offer the changes for adoption by licensees. This notice solicits comment on proposed changes to the ISTS, which if implemented by a licensee will modify the plant-specific TS. The NRC staff will evaluate any comments received and reconsider the changes or announce the availability of the changes for adoption by licensees. Licensees opting to apply for this TS change are responsible for reviewing the NRC staff's SE., and the applicable technical justifications, providing any necessary plant-specific information, and assessing the completeness and accuracy of their license amendment request (LAR). The NRC will process each amendment application responding to the notice of availability according to applicable NRC rules and procedures.

The proposed changes do not prevent licensees from requesting an alternate approach or proposing changes other than those proposed in TSTF–505, Revision 1. However, significant deviations from the approach recommended in this notice or the inclusion of additional changes to the license require additional NRC staff review. This may increase the time and resources needed for the review or result in NRC staff rejection of the LAR. Licensees desiring significant deviations or additional changes should instead

submit an LAR that does not claim to adopt TSTF-505, Revision 1.

Dated at Rockville, Maryland, this 6th day of November 2011.

For the Nuclear Regulatory Commission.

John R. Jolicoeur,

Chief, Licensing Processes Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.
