

to have been incurred, and paid, for purposes of ERRP, are detailed at <http://www.errp.gov>, by clicking on Common Questions, and then clicking on Costs and Reimbursement.

We note that our decision to deny reimbursement requests that include claims with incurred dates of January 1, 2012, or after, is based on the actual availability of remaining appropriated ERRP funds and the rate at which reimbursements have been disbursed, as opposed to the projected amounts of ERRP reimbursements that applicants listed in their ERRP applications. Should circumstances related to the availability of ERRP funding change, we may decide it is appropriate to approve reimbursement requests that include claims incurred after December 31, 2011. If this occurs, we will provide such notice in the **Federal Register**.

III. Collection of Information Requirements

This document does not impose any new information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995. However, the information collection requirements associated with the ERRP are currently approved under OMB control number 0938-1087, with an expiration date of September 30, 2014.

Authority: 45 CFR 149.45(a).

Dated: December 6, 2011.

Marilyn Tavener,

Acting Administrator, Centers for Medicare & Medicaid Services.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Family and Youth Services Bureau; Proposed Information Collection Activity; Comment Request

Title: Personal Responsibility Education Program (PREP) Multi-Component Evaluation.

OMB No.: 0970-0398

Description: The Family and Youth Services Bureau (FYSB) and the Office

of Planning, Research, and Evaluation (OPRE), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), are proposing data collection activity as part of the PREP Multi-Component Evaluation.

The goals of the PREP Multi-Component Evaluation are to document how PREP programs are operationalized in the field, collect performance measure data for PREP programs, and assess the effectiveness of selected PREP-funded programs. The PREP Multi-Component Evaluation will make a significant contribution to the teen pregnancy prevention literature and will produce useful findings for state and federal policymakers, researchers, and program administrators.

The evaluation will include the following three primary, interconnected components, or “studies”:

1. *The Impact and Implementation Study (IS):* This study will involve impact and in-depth implementation evaluations of four to five specific PREP-funded sites. The study will consider how selected programs implemented key components of the PREP program, such as adult preparation subjects and substantial emphasis on abstinence and contraception and addressed key implementation considerations, such as adherence, dosage, quality of service delivery, and participant response. The impact of the selected PREP programs will be determined based on a random assignment (at the individual, classroom, or school level) evaluation design, which will involve baseline surveys and two follow-up surveys. This will allow short- and long-term impacts to be measured. One information collection request for a field instrument, focused on discussions with individuals involved in PREP programs (*i.e.* state-level PREP program coordinators, program directors, program staff, and school administrators) in order to inform site selection for this study, was approved on November 6, 2011.

2. *The Design and Implementation Study (DIS):* This study will be a broad descriptive analysis of how States designed and implemented PREP programs. The study will use multiple methods of information collection, including telephone interviews that will be conducted in every state operating a

PREP program, to better understand the general design and implementation of PREP programs. For this study, two rounds of interviews will be conducted: The first round of interviews, known as the “Design Survey”, will focus on how states designed programs, and the second round of interviews, known as the “Implementation Survey”, will focus on how states and sub-awardees actually implemented their programs. An information collection request has already been submitted to OMB for the “Design Survey” discussion guide.

3. *The Performance Analysis Study (PAS):* This study will focus on the development and collection of performance data for the purpose of semi-annual and annual reporting on state PREP performance outcomes, in order to determine if PREP grantees (*i.e.* states and sub-awardees) are meeting performance benchmarks related to the program’s mission and priorities. At present, there is only one information collection request for the PAS.

This 60 Day Notice covers (a) the baseline and administrative instruments for the Impact and Implementation Study; (b) all instruments for the Performance Analysis Study; and (c) a request for OMB to waive subsequent 60-day **Federal Register** notices pertaining to the PREP Multi-Component Evaluation.

Impact and Implementation Study Respondents: Respondents to the baseline survey will be participants in PREP-funded programs, including school students and other youth. Administrative respondents include schools and organizations that oversee PREP-funded programs or that have program and/or school participation data.

Performance Analysis Study Respondents: Performance measurement data collection instruments will be administered to individuals representing states (*i.e.* PREP state-level coordinators), as well as sub-awardees (*i.e.* program directors), program facilitators, other program staff, and program participants.

Annual Burden Estimates

The following instruments, part of the Impact and Implementation Study (IIS), were approved on November 6, 2011.
