

that were included in the alternatives analysis for the Project. Although, Western is making a decision regarding the interconnection request submitted by Solar Reserve and does not dictate the type of generation, the SA/DEIS examined alternative generation types.

Land use plan inconsistency is also noted by La Cuna and CARE. Western notes the comment and emphasizes that the decision being made in this ROD is only to grant the interconnection request for the Project and does not signify that all the other permitting and land use requirements have been met.

La Cuna and CARE mention that, “the purpose and need statements are too narrowly constructed.” Western has noted the comment and refers the reader to pages 2–4 and 2–8 through 2–9 for more information on the agency’s authority, Purpose and Need.

Cumulative impacts were another issue of concern for La Cuna and CARE. Western directs the reader to section 5 of the document for the rationale describing which projects were considered for the cumulative impacts analysis as well as for the results of the analysis.

La Cuna and CARE also expressed concern that a programmatic EIS (PEIS) should have been developed prior to this EIS. Although, there is currently a PEIS being developed for solar projects, there is no requirement for the completion of a PEIS prior to the completion of a project specific EIS.

Lack of appropriate mitigation was also noted by La Cuna and CARE. Western directs the reader to the SA/DEIS and the CEC Conditions of Certification to the 186 conditions of certification/mitigation measures that have been created and will be implemented for the Project.

Finally, La Cuna and CARE raise a concern that, “the RMP violates the Federal Land Policy Management Act [FLPMA].” Western acknowledges this comment and the concern that La Cuna and CARE have with BLM’s FLMPA responsibilities.

Decision

Western’s decision is to allow RSE’s request for interconnection to Western’s transmission system at its Parker-Blythe No. 2 Transmission Line and to construct, own and operate a new substation.³ Western’s decision to grant this interconnection request satisfies the agency’s statutory mission and RSE’s

objectives while minimizing harm to the environment.

This decision is based on the information contained in the Rice Solar Energy Project Final EIS. This ROD was prepared pursuant to the requirements of the Council on Environmental Quality Regulations for Implementing NEPA (40 CFR parts 1500–1508) and DOE’s Procedures for Implementing NEPA (10 CFR part 1021).
