The DEIS/GMP presents three management alternatives for Buck Island Reef National Monument in addition to the no-action alternative. As a no-take marine reserve, the DEIS/GMP seeks to achieve an acceptable standard of service for resource protection and visitor experience within the park's 19,015 acres.

The four alternatives and their key provisions are summarized. Alternative A (No-action Alternative): The continuation of current management practices and trends. This alternative would limit anchoring and provide access to Buck Island for up to 87 vessels. Alternative B (The NPS Preferred Alternative): This alternative provides for moorings and limited opportunities for anchoring for vessels at designated locations. No bow and stern anchoring would be permitted under this alternative, and anchoring would be phased out over 10 years. This alternative would provide access to Buck Island for up to 72 vessels. Alternative C: This alternative provides for bow and stern anchoring and new moorings. Access to Buck Island would be provided for up to 92 vessels. Alternative D: This alternative provides for recreational opportunities similar to existing conditions under Alternative A, with the exception that shoreline bow and stern anchoring would be eliminated. Access to Buck Island would be provided for up to 112 vessels.
