Proposed Information Collection; Comment Request; Reporting of Sea Turtle Incidental Take in Virginia Chesapeake Bay Pound Net Operations

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before May 8, 2012.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at Jjessup@doc.gov).

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection. This action would continue the reporting measure requiring all Virginia Chesapeake Bay pound net fishermen to report interactions with endangered and threatened sea turtles, found both live and dead, in their pound net operations. When a live or dead sea turtle is discovered during a pound net trip, the Virginia pound net fisherman is

required to report the incidental take to National Marine Fisheries Service (NMFS) and, if necessary, the appropriate rehabilitation and stranding network. This information will be used to monitor the level of incidental take in the state-managed Virginia pound net fishery and ensure that the seasonal pound net leader restrictions (50 CFR 223.206(d)(10)) are adequately protecting listed sea turtles. Based on the number of sea turtle takes anticipated in the Virginia pound net fishery and the available number of Virginia pound net fishermen and pound nets, the number of responses anticipated on an annual basis is 483.

II. Method of Collection

Reports may be made either by telephone or fax.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a currently approved information collection.

NOAA funds habitat restoration projects including grass-roots, community-based habitat restoration; debris prevention and removal; removal of barriers to migrating fish; and large-scale, targeted restoration through individual projects and restoration partnerships. Awards are made as grants or cooperative agreements under the authority of the Magnuson-Stevens Fishery Conservation and Management Act and the Fish and Wildlife Coordination Act, 16 U.S.C. 661, as amended by the Reorganization Plan No. 4 of 1970.

NOAA requires specific information on habitat restoration projects that we fund, as part of routine progress reporting. Recipients of NOAA funds submit information such as project location, restoration techniques used, species benefited, acres restored, stream miles opened to access for diadromous fish, volunteer participation, and other parameters.

The required information enables NOAA to track, evaluate and report on coastal and marine habitat restoration and demonstrate accountability for federal funds. This information is used to populate a database of NOAA-funded habitat restoration, debris prevention and removal, and barrier removal projects. The database, with its robust querying capabilities, is instrumental to provide accurate and timely responses to NOAA, Department of Commerce, Congressional and Constituent inquiries. It also facilitates reporting by NOAA on the Government Performance and Results Act "acres restored" performance measure. Grant recipients are required by the NOAA Grants Management Division to submit periodic performance reports and a final report for each award; this collection stipulates the information to be provided in these reports.

II. Method of Collection

Respondents have a choice of either electronic fillable forms or paper forms. Methods of submittal include email of electronic forms, or mailing of paper forms.

III. Data

OMB Control Number: 0648-0472.

Form Number: None.

Type of Review: Regular submission (extension of a currently approved collection).

Affected Public: Not-for-profit institutions; state, local, or tribal government; business or other for-profit organizations.

Estimated Number of Respondents: 250.

Estimated Time per Response: Semi-annual reports, 7 hours, 45 minutes; final reports, 12 hours, 30 minutes.

Estimated Total Annual Burden Hours: 4,145.

Estimated Total Annual Cost to Public: \$0 in recordkeeping/reporting costs.

IV. Request for Comments

Proposed Information Collection; Comment Request; Marine Recreational Information Program

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision of a current information collection.

Marine recreational anglers are surveyed to collect catch and effort data, fish biology data, and angler socioeconomic characteristics. These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.), as amended, regarding conservation and management of fishery resources.

Marine recreational fishing catch and effort data are collected through a combination of mail surveys, telephone surveys and on-site intercept surveys with recreational anglers. Amendments to the Magnuson-Stevens Fishery Conservation and Management Act (MSA) require the development of an improved data collection program for recreational fisheries. To meet these requirements, NOAA Fisheries has designed and tested new approaches for sampling and surveying recreational anglers. Revision: A mail survey that samples from a residential address frame will be implemented to collect data on the number of marine recreational anglers and the number of recreational fishing trips. This survey will replace the Coastal Household Telephone Survey, which has traditionally been used to collect recreational fishing effort data. In addition, the sampling and estimation procedures for the access-point angler intercept survey have been revised to ensure better coverage and representation of recreational fishing activity.

This revision also eliminates several data collections that were implemented to test revised sampling procedures. The following data collections will be eliminated: Longitudinal Sampling for Coastal Household Telephone Survey, a Directory Frame Telephone Survey of Licensed Marine Recreational Anglers, the Angler Diary Recruitment Screening Questionnaire, and Biological Data Collection.

II. Method of Collection

Information will be collected through mail surveys and on-site intercept interviews.
