SUPPLEMENTARY INFORMATION:

I. Background

Independent contractors (contractors) perform services or construction at a mine. They may be engaged in virtually every type of work performed at a mine, including activities such as clearing land, excavating ore, processing minerals, maintaining, or repairing equipment, or constructing new buildings or new facilities, such as shafts, hoists, conveyors, or kilns. Independent contractors vary in size, the type of work performed, and the time spent working at mine sites. Some contractors work exclusively at mining operations, others may work a single contract at a mine and never return to MSHA jurisdiction.

The work contractors perform can pose serious dangers to employees. From January 1, 2001 through June 30, 2011, 623 miners have been fatally injured in mining accidents; 143 of those (or about 23%) worked for independent contractors. MSHA uses the contractor information during inspections to determine the responsibility for compliance with safety and health standards and to facilitate the service of documents.

II. Desired Focus of Comments

The Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to independent contractors. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Address the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses, to minimize the burden of the collection of information on those who are to respond.

The public may examine publicly available documents, including the public comment version of the supporting statement, at MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2350, Arlington, VA 22209–3939. OMB clearance requests are available on MSHA's Web site at <http://www.msha.gov> under "Rules & Regs" on the right side of the screen by selecting *Information Collections Requests, Paperwork Reduction Act Supporting Statements*. The public comment version of the supporting statement will be available on MSHA's Web site for 60 days after the publication date of this notice. Comments submitted in writing or in electronic form will be made available for public inspection. Because comments will not be edited to remove any identifying or contact information, MSHA cautions the commenter against including any information in the submission that should not be publicly disclosed. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

The information obtained from mine operators is used by MSHA during inspections to determine compliance with safety and health standards. MSHA has updated the data in respect to the number of respondents and responses, as well as the total burden hours and burden costs supporting this information collection extension request. MSHA does not intend to publish the results from this information collection and is not seeking approval to either display or not display the expiration date for the OMB approval of this information collection.
