BILLING CODE 4312-51-P

DEPARTMENT OF THE INTERIOR**Bureau of Ocean Energy Management**

**Outer Continental Shelf (OCS), Alaska
OCS Region, Cook Inlet Planning Area,
Proposed Oil and Gas Lease Sale 244
for OCS Oil and Gas Leasing Program
2012–2017**

AGENCY: Bureau of Ocean Energy
Management (BOEM), Interior.

ACTION: Request for Interest (RFI).

SUMMARY: The Proposed OCS Oil and
Gas Leasing Program for 2012–2017
(Proposed Program) identifies Sale 244
as a potential special interest sale for the
Cook Inlet Planning Area in Alaska.
While industry interest in the Federal
OCS offshore area has been limited in
the past decade, recently there has been
renewed interest in exploring for and

developing additional hydrocarbon
resources in the south-central region of
the state, as evidenced by acreage leased
in state sales and announced discoveries
of natural gas on state-managed lands,
both offshore and onshore.

This RFI seeks to determine the level
of industry interest in a possible Sale
244 in 2013 in the Cook Inlet Planning
Area, whether focused on a few blocks
or prospects, or on a larger portion of
the program area.

BOEM is also seeking comments from
tribal, local, and state governments,
Federal agencies, and the general public
to evaluate whether the agency should
proceed with further evaluations
pursuant to the OCS Lands Act
(OCSLA), the National Environmental
Policy Act (NEPA), the Endangered
Species Act (ESA), and all other
applicable laws and regulations. BOEM
will consider the level of industry
interest and other issues and concerns
reflected in comments in its
determination on how to proceed.
BOEM will then decide on whether to
proceed with further evaluation of this
special interest sale. This RFI does not
indicate a decision to include Sale 244
in the Proposed Final OCS Oil and Gas
Leasing Program for 2012–2017 (Final
Program) or to lease in the Cook Inlet
Planning Area.

DATES: All responses to the RFI on
proposed Cook Inlet Sale 244 must be
received no later than May 11, 2012.
Written nomination submittals should
be labeled “Comments on Proposed
Special Interest Sale 244.”

FOR FURTHER INFORMATION CONTACT: Fred
King, Chief, Leasing Section, Leasing
and Plans, BOEM, Alaska OCS Region,
3801 Centerpoint Drive, Suite 500,
Anchorage, Alaska 99503–5823, or at
(907) 334–5271.

SUPPLEMENTARY INFORMATION:**Request for Interest and Information**

1. *Authority:* This RFI is published
pursuant to the OCSLA, as amended (43
U.S.C. 1331–1356 (1994)) and the
regulations issued thereunder (30 CFR
Part 556) and in accordance with the
Proposed Program.

Due to the long lead time necessary to
prepare for a sale, this RFI is being
published before a final decision is
made later in 2012 on which sales will
be included in the Final Program. This
proposed sale was included in the
Proposed Program with a sale date
tentatively scheduled for late 2013. If
the Final Program includes proposed
Cook Inlet Sale 244, BOEM will
continue to prepare for the sale, and the
final decision to hold or cancel the sale
will likely be made in late 2013 as part

of the sale preparation process. If the Final Program does not include this sale, then BOEM will terminate preparations for the sale.

2. *Purpose of RFI:* This RFI seeks to determine the level of industry interest and whether that interest, if any, is focused on a few blocks or prospects or on a larger portion of the program area. BOEM is also seeking comments from tribal, local, and state governments, Federal agencies, and the general public to determine whether BOEM should proceed with further evaluations pursuant to the OCSLA, NEPA, ESA, and other applicable laws and regulations.

This information-gathering step is important to ensure that all pertinent information is assessed in determining whether to proceed with further evaluation of the special interest leasing process pursuant to the OCSLA and regulations at 30 CFR Part 556. A special interest leasing option allows BOEM to consider for further evaluation a very focused or larger area of the Cook Inlet Planning Area, depending on interest. This RFI does not indicate a decision to include Sale 244 in the Final Program or to lease in the Cook Inlet area described below.

After the 45-day RFI comment period closes, BOEM will decide whether to continue the process after consideration of the nomination information and comments received. If industry response to this RFI does not indicate sufficient interest at this time, then preparations for Sale 244 will not proceed. BOEM may issue another RFI subsequently to gauge industry interest in a potential lease sale in the Cook Inlet Planning Area later in the Proposed Program.

If sufficient industry interest is received during the RFI process, including nominations of specific blocks in response to the RFI, and after reviewing and considering the other information provided, BOEM may recommend to the Assistant Secretary—Land and Minerals Management, that the sale process should continue, as well as the size of the area to be considered for further evaluation in the process referred to as Area Identification. Following Area Identification, the BOEM Alaska Region will prepare the appropriate NEPA analysis of potential environmental effects of oil and gas leasing, exploration, development, and production in the proposed sale area and its vicinity. After the completion of the NEPA process and consultation with the Governor of Alaska, if BOEM determines that leasing and potential exploration can occur in an environmentally safe manner, then

BOEM may proceed with the leasing process for a competitive sale in the general area of interest.

Sale 244 is tentatively scheduled for late 2013 under the Proposed Program. BOEM is starting the RFI process now to allow sufficient time to complete all of the steps in the presale process to hold a sale in 2013, in the event that the decision is made to proceed with a potential lease sale in the Cook Inlet Planning Area. As explained above, issuance of this RFI does not indicate a decision to lease in the Cook Inlet Planning Area.

3. *Background and Description of the Area:* Five Federal OCS sales have been held in the Cook Inlet Planning Area within the past 34 years. In October 1977, Sale CI resulted in 88 leases being issued. In September 1981, Sale 60 resulted in 13 leases being issued. A re-offering sale, Sale RS-2, was held in August 1982, but no bids were received and no leases resulted from this sale. Sale 149, held in June 1997, resulted in 2 leases issued. Sale 191 was held in May 2004, and no bids were submitted. Two special interest Cook Inlet Sales, 211 and 219, were scheduled under the 2007–2012 Program. On July 8, 2008, the Minerals Management Service (now BOEM) issued a RFI for Cook Inlet Sale 211. The comment period closed October 6, 2008. MMS received three comments, but no industry nominations identifying specific leasing interest. In 2008, MMS decided not to proceed with the Sale 211 presale process. On March 2, 2011, the decision to cancel Sale 219 was published in the **Federal Register**. Between 1978 and 1985, a total of 13 exploratory wells were drilled on Federal leases in the Cook Inlet Planning Area, all have been permanently plugged and abandoned. The State of Alaska currently has active oil and gas leases with two drill operations preparing for the 2012 drill season. Companies have purchased leases offshore at the State-held Cook Inlet Sale in June 2011. The most recent State oil and gas lease sale held in December 2011 included 575,202 acres. There are currently no active Federal OCS leases in Cook Inlet.

The BOEM document “Assessment of Undiscovered Technically Recoverable Oil and Gas Resources of the Nation’s Outer Continental Shelf, 2011” estimates the mean undiscovered conventionally recoverable resources for the Cook Inlet Planning Area at 1.01 billion barrels of oil and 1.2 trillion cubic feet of gas (http://www.boem.gov/uploadedFiles/2011_National_Assessment_Factsheet.pdf).

The Cook Inlet Planning Area is located offshore the State of Alaska just

south of Kalgin Island and the Barren Islands and continues south through Shelikof Strait to just above the southern tip of Kodiak Island (see map below). The Cook Inlet Planning Area consists of approximately 1,093 whole and partial blocks covering about 2.1 million hectares (about 5.3 million acres). It extends from 3 to approximately 60 nautical miles offshore, in water depths from about 30 feet to approximately 650 feet. A map of the Cook Inlet Planning Area accompanies this RFI. A large-scale RFI map showing the boundaries of the Cook Inlet Planning Area on a block-by-block basis is available on the BOEM Web site at <http://www.boem.gov/aksale244>.

4. *Instructions on RFI:* If a company is interested in potentially acquiring oil and gas leases in the Cook Inlet Planning Area, it should send specific written nomination information to: Chief, Leasing Section, BOEM, Alaska OCS Region, 3801 Centerpoint Drive, Suite 500, Anchorage, Alaska 99503–5823. Written nominations must be received by May 11, 2012. The written information from industry nominating specific blocks, which BOEM considers proprietary, will not be released to the public. If a company believes that a larger area should be considered, it should explicitly describe its interest, including a summary of the geologic and economic information about that larger area. To avoid inadvertent release of proprietary information, please mark all documents “Confidential—Contains Proprietary Information” on every page containing such information. This written letter of nomination may include maps, and should include a company contact name, address, and phone number(s) that BOEM can use if it needs additional information or clarification. Submittals should indicate “Responses to RFI for Proposed Cook Inlet Special Interest Lease Sale 244.”

Respondents should rank areas they have nominated according to priority of interest; for example, priority 1 (high), 2 (medium), and/or 3 (low) on a large-sale RFI map available at <http://www.boem.gov/aksale244>. Respondents are encouraged to be specific in indicating blocks by priority and be prepared to discuss their range of interest and activity regarding the nominated area(s). Please provide the telephone number and name of a person to contact in the organization’s response. BOEM’s Alaska OCS Regional office may contact this person to set up a mutually agreeable meeting to more fully review the company’s level of interest.

BOEM is seeking comments and information from all interested parties about particular geological (including natural hazard areas), environmental, biological, archaeological, and socioeconomic conditions or potential conflicts, or other information that might bear upon the potential leasing, exploration, and development in the program area and its vicinity. Except for written letters of nomination, all other comments to the RFI, including general information from companies, federal agencies, state and local governments, tribes and other interested parties and individuals will be accepted only through <http://www.regulations.gov>, using docket designation: BOEM-2012-0017. All comments received via [regulations.gov](http://www.regulations.gov), including names and addresses of respondents, are public and will be posted for public review on [regulations.gov](http://www.regulations.gov).

BOEM will not consider anonymous comments. BOEM will make available in their entirety on [regulations.gov](http://www.regulations.gov) all non-proprietary submissions from organizations or businesses, and from

individuals identifying themselves as representatives or officials of organizations or businesses. All written nomination information submitted by industry about their interest will remain proprietary and will not be released.

5. *Use of RFI Information:* Information submitted in response to this RFI will be used for several purposes. Responses will be used to:

- Determine whether to proceed with the leasing process for a special-interest oil and gas lease sale in the Cook Inlet Planning Area;
- Identify specific areas of interest for oil and/or gas leasing, exploration, and development;
- Identify potential environmental effects and potential use conflicts;
- Develop the appropriate level of environmental analysis, if the level of industry interest is such that BOEM recommends proceeding with the special interest sale process;
- Develop lease terms, conditions, and mitigating measures.

6. *Existing Information:* An extensive environmental, social, and economic Studies Program has been underway in

the Alaska OCS Region since 1976, including studies in the Cook Inlet Planning Area. The emphasis has been on environmental characterization of biologically sensitive habitats, endangered whales and marine mammals, physical oceanography, ocean-circulation modeling, subsistence uses, and ecological and socio-cultural effects of oil and gas activities. NEPA analyses were prepared for the previous OCS sales held in the Cook Inlet Planning Area.

Information on the BOEM Environmental Studies Program, completed studies, and a program status report for continuing studies in this area is available on the BOEM Web site <http://www.boem.gov/akstudies>, or may be obtained from the Chief, Environmental Studies Section, Alaska OCS Region, by telephone request at (907) 334-5283.

Dated: March 6, 2012.

Tommy P. Beaudreau,
Director, Bureau of Ocean Energy
Management.

DEPARTMENT OF THE INTERIOR
Bureau of Ocean Energy Management
Environmental Documents Prepared
for Proposed Oil, Gas, and Mineral
Operations by the Gulf of Mexico Outer
Continental Shelf (OCS) Region

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Notice of the availability of Environmental Documents Prepared for OCS Mineral Proposals by the Gulf of Mexico OCS Region.

SUMMARY: The Bureau of Ocean Energy Management (BOEM), in accordance with Federal Regulations that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related Site-Specific Environmental Assessments
