

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

After extensive research, OSHA found no U.S. employer who currently produce DBCP or DBCP-based end-use products, most likely because the Environmental Protection Agency (EPA) registration suspension for this substance remains in effect; therefore, no cost or time burdens accrue to employers under the Standard. The Agency requests one hour for OMB to approve the information collection provisions of the Standard so that it can enforce the paperwork requirements of the Standard if EPA lifts the suspension or technology develops new applications for DBCP.

Type of Review: Extension of a currently approved collection.

Title: 1, 2-Dibromo-3-Chloropropane (DBCP) Standard (29 CFR 1910.1044).

OMB Control Number: 1218-0101.

Affected Public: Business or other for-profits; Federal Government; State, Local or Tribal Government.

Frequency: On occasion.

Average Time Per Response: 0.

Estimated Total Burden Hours: 1.

Estimated Cost (Operation and Maintenance): \$0.
