SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision of a current information collection.

The objective of these surveys is to assess the level of awareness on issues related to regulations preventing feeding/harassment of wild bottlenose dolphins, which are protected under the Marine Mammal Protection Act. In particular, the surveys are designed to determine what commercial businesses and the general public know about specific regulations prohibiting feeding and harassment of bottlenose dolphins, and how they gained their knowledge and/or perceptions on the topic. The first survey was conducted in Panama City, Florida, where numerous incidences of dolphin harassment and feeding are continually documented. Revision: The intent is to use this survey in one to two other geographic areas of the southeast region that are also "hot-spots" for dolphin harassment and feeding activities to gain a similar understanding and ensure outreach messages are appropriate for intended audiences.

National Marine Fisheries Service (NMFS) will request information from local residents, tourists, and commercial businesses through a one-time survey in the geographic location identified in the revision supporting statement. This information, upon receipt, will be used to develop effective and better-targeted outreach efforts in order to enhance bottlenose dolphin conservation in the southeast United States.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) authorizes the Gulf of Mexico Fishery Management Council (Council) to prepare and amend fishery management plans for any fishery in waters under its jurisdiction. National Marine Fisheries Service (NMFS) manages the shrimp fishery in the waters of the Gulf of Mexico (Gulf) under the Shrimp Fishery Management Plan (FMP). The electronic logbook (ELB) regulations for the Gulf shrimp fishery may be found at 50 CFR § 622.5(a)(iii).

There are currently approximately 1,563 permitted vessels that harvest shrimp from the Exclusive Economic Zone (EEZ), and the Council estimates that there are over 13,000 boats that fish in state waters. With such a large number of vessels of differing sizes, gears used, and fishing capabilities compounded by seasonal variability in abundance and price and the broad geographic distribution of the fleet, ELBs provide a more precise means of estimating the amount of fishing effort than current methods. Using ELBs to improve estimating fishing effort will help improve estimating bycatch in the Gulf shrimp fleet.

II. Method of Collection

The electronic logbook autonomously collects effort data and is downloaded by contract personnel every 2-3 months. The electronic logbook memory chip will be removed from the unit and downloaded at the contractor site in College Station, Texas. A new logbook memory chip will replace the removed memory chip, a process taking less than one minute.
