SUPPLEMENTARY INFORMATION:

I. Background

Chapter 5 U.S.C. 8506 states that “Each agency of the United States and each wholly or partially owned instrumentality of the United States shall make available to State agencies which have agreements, or to the Secretary of Labor, as the case may be, such information concerning the Federal service and Federal wages of a Federal employee as the Secretary considers practicable and necessary for the determination of the entitlement of the Federal employee to compensation under this subchapter.” The information shall include the findings of the employing agency concerning:

- (1) Whether or not the Federal employee has performed Federal service;
- (2) The periods of Federal Service;
- (3) The amount of Federal wages; and
- (4) The reasons for termination of Federal service.

The law (5 U.S.C. 8501, et seq.) requires State Workforce Agencies (SWA's) to administer the Unemployment Compensation for Federal Employees (UCFE) program in

accordance with the same terms and provisions of the paying State's unemployment insurance law which apply to unemployed claimants who worked in the private sector. SWA's must be able to obtain certain information (wage, separation data) about each claimant filing claims for UCFE benefits to enable them to determine his/her eligibility for benefits. The Department of Labor has prescribed forms to enable SWAs to obtain this necessary information from the individual's Federal employing agency. Each of these forms is essential to the UCFE claims process and the frequency of use varies depending upon the circumstances involved. The UCFE forms are: ETA-931, ETA-931A, ETA-933, ETA-934, and ETA-935.

II. Review Focus

The Department is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
