

proposal to establish the performance default payment percentage at ten percent. The Bureaus anticipate that a performance default payment of ten percent of the defaulted support level will be effective in encouraging those seeking support to make every effort to assure that they are capable of meeting their obligations and protecting against costs to the Commission and the USF without unduly discouraging auction participation. The Bureaus therefore adopt this proposal.

FEDERAL COMMUNICATIONS COMMISSION

[WC Docket Nos. 10-90 and 05-337; DA 12-639]

Wireline Competition Bureau Announces Support Amounts for Connect America Fund Phase One Incremental Support

AGENCY: Federal Communications Commission.

ACTION: Notice; solicitation of comments.

SUMMARY: In this document, the Wireline Competition Bureau (Bureau), identifies the data sources it relied on and announce support amounts for CAF Phase I incremental support for 2012.

DATES: Carriers must file notices stating the amount of support each wishes to accept, and the areas by wire center and census block in which the carrier intends to deploy broadband, or stating that the carrier declines incremental support for 2012, no later than July 24, 2012.

ADDRESSES: You may submit notices stating the amount of support you wish to accept, identified by WC Docket Nos. 10-90 and 05-337, by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the Internet by accessing the ECFs: <http://fjallfoss.fcc.gov/ecfs2/>.

- *Paper Filers:* Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number.

- *People with Disabilities:* To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (tty).

FOR FURTHER INFORMATION CONTACT:

Joseph Cavender, Wireline Competition Bureau at (202) 418-1548 or TTY (202) 418-0484.

SUPPLEMENTARY INFORMATION:

1. The *USF/ICC Transformation Order and FNPRM*, 76 FR 76623, December 8, 2011, comprehensively reformed and modernized the universal service and intercarrier compensation systems. Among other things, the Commission established a transitional mechanism to distribute high-cost universal service support to price cap carriers, known as the Connect America Fund Phase I (CAF

Phase I). In addition to freezing existing high-cost support for price cap carriers, the Commission adopted a process to distribute up to \$300 million of additional, incremental support in 2012 among such carriers to advance broadband deployment. The Commission delegated to the Wireline Competition Bureau (Bureau) the task of performing the calculations necessary to determine support amounts and selecting the necessary data.

2. In an earlier Notice, 77 FR 9653, February 17, 2012, we sought comment on wire center data submitted by Windstream Communications that the carrier proposed we use for CAF Phase I. We also sought data for areas for which Windstream had not submitted data and sought comment on alternate approaches to generating sufficiently reliable data for such areas. In addition, because only the wire centers of price cap carriers and their affiliates would be relevant to the distribution of incremental high cost support; we sought comment on a proposed list of wire centers to include in our analysis. In a subsequent letter, we identified various additional data sources we might rely on. In this Notice, we identify the data sources we rely on and announce support amounts for CAF Phase I incremental support for 2012.

3. For wire centers in the contiguous territory of the United States plus Hawaii, we use the data submitted by Windstream. US Telecom, on behalf of nine holding companies of price cap carriers serving that area, filed comments supporting the use of those data, and provided a detailed explanation of the commercially available sources relied upon and the statistical techniques used to generate the data. No party objected to the use of such data.

4. For Alaska, we use data submitted by Alaska Communications Systems Group, Inc. for its wire centers in that state, which it developed using both internal and commercially available resources. No party objected to the use of those data.

5. For the Commonwealth of the Northern Marianas, we use mapping data and business count data submitted by Micronesian Telecom for its wire centers in that territory. No party objected to the use of those data. In addition, for household counts, we use Geolytics estimates data. For road feet, we use US Census TIGER data. We allocate census block data to wire centers based on the mapping data submitted by the carrier. We calculate business counts for each census block using data supplied by the carrier in conjunction with an estimation
